

## BAB V

### CONCLUSION AND SUGGESTION

#### A. Conclusion

Based on the results of research that has been conducted at SMPN 1 Pinrang by distributing 20 questionnaires to 45 respondents regarding the effect of the Ruang guru application on students' English learning achievement, the researchers conclude that: Based on the results of the calculation of the correlation 0.55. This value is not negative, meaning that the calculated correlation between Variable X has an effect on Variable Y and there is a unidirectional relationship with other words that have a unidirectional relationship. the positive influence between the two variables whose magnitude ranges from 0.40 to 0.70 means that the positive correlation between the variables X and Y is a moderate or sufficient correlation.

#### B. Suggestion

Based on the results of research and analysis of calculations that have been carried out by researchers regarding the correlation of the Ruangguru application on students' learning achievement in English, the authors provide the following suggestions:

1. For companies

- a. The Ruang guru application is expected to be redeveloped for every feature in the Ruang guru application so that it can make students more fun in learning
  - b. For the cost of Ruang guru online tutoring because this is a paid application, it is hoped that it will not be too expensive and still provide discounts to users who have subscribed and who have just subscribed to Ruang guru.
2. For students, with the Ruang guru application, it is hoped that it can be utilized optimally, especially during the pandemic, because Ruang guru is present as an alternative online tutoring that can be easily accessed by students via Smartphone, laptops or tablets, and can increase interest and learning achievement. with interesting features in it.
  3. The results of the research are expected to be a source of information for the development of technology-based studies in the field of education and hopefully become a reference for further research related to the application of online tutoring with the study of media communication.
  4. For academic purposes, it is necessary to research online learning applications provided for free by the Ministry of Education and Culture such as reading houses and so on, and see how much influence the free applications have in increasing student interest and learning outcomes and can be compared with paid online learning applications, because the researchers themselves are only looking for the influence of paid online learning applications.
