ACKNOWLEDGEMENT

بِسْمِ اللّٰهِ الرَّحْمٰنِ الرَّحِیْمِ

In the name of Allah, The Beneficent and The Merciful

Alhamdulillah, the researcher thanks to Allah swt. the lord of the universe. He always gives strong and favor in completing this “Skripsi” by the title “The correlation between students’ Learning Style and Students’ Reading Comprehension at the Tenth grade of MA DDI Takkalasi”. Blessing and salvation be upon beloved prophet Muhammad saw. and his family, his companions, and his followers.

The researcher wants to thank a lot to all people who support and help her. She realizes that without their support and help, she could not be able to finish this “Skripsi”.

In this opportunity, the researcher would like to express her gratitude to Drs. Anwar M.Pd and Dra. Hj Nanning, M.Pd for their valuable advice, guidance, dedication, correction, and suggestions in finishing this “Skripsi”.

There are also some people that the researcher would like to thank to:

1. The rector of State Islamic Institute (IAIN) Parepare, Dr. Ahmad Sultra Rustan, M.Si. and his staffs their help and motivation during she finished her study.
2. Bahtiar, S.Ag., M.A. as the chairman of Tarbiyah Department of IAIN Parepare who has given the researcher a guideline in finishin this skripsi.
3. Mujahidah, M.Pd, as the chairman of English Education Program for the fabulous serving to the students.
4. Drs. Anwar M.Pd, the first consultant who has guided the writer and who has given her much suggestion in writing and finishing this skripsi. Thanks for your good advice and valuable input.

5. Dr. Hj Nanning M.Pd, as the second consultant who has given her much motivation, guidance and suggestion that very helpful to complete the skripsi. Thanks for your good advice and valuable input.
6. All lecturers of English Education Program who have already taught the researcher during her study in IAIN Parepare.
7. Dr. Agus Muchsin, M.Ag, as the lecture of syari'ah who have already taught the researcher during her study in IAIN Parepare.
8. Amirullah, S.Pd as the English Teacher of MA DDI Takkalasi who has given the researcher advices in teaching and doing the research
9. Asmayani, S.Pd as the Teacher of MA DDI Takkalasi who has given the researcher support while doing the research.
10. The researcher wants to give her sincerest gratitude to her beloved parents, Syamsuddin Tang SE and Nurdawiah for their supporting and always pray for her until the Degree of Strata-I (S1), and her beloved sister Misra who have given her strengths to pass this study.
11. Her special friend, M. Arafah who has been a motivator for her, who always advise her and pushed her to finish this research.
12. Her best friends in Elbrus Family: Masriani, Widya Pribadiyanti Areski, Hajirah, Nasrah, Siti Lestari, Nurfitri, and Hariani, who always give their support and courage as well as their helping for finishing this research.
13. Her other best friends: Nuryani and Damiati, Nasrah Muin, Irma Maming who have pushed her to finish the research.
14. Her friends in English Program of Tarbiyah Department 2014. Thanks for giving support and sharing their time and being good friends.

15. All people who have given their help in writing this “Skripsi” that the researcher could not mention it one by one.

The words are not enough to appreciate for their help and contribution in writing this “Skripsi”, may Allah swt. Bless them all. Finally, researcher realizes that this research “Skripsi” is not perfect yet. Therefore, the researcher would like to accept critics and suggestion from everyone who reads this research.

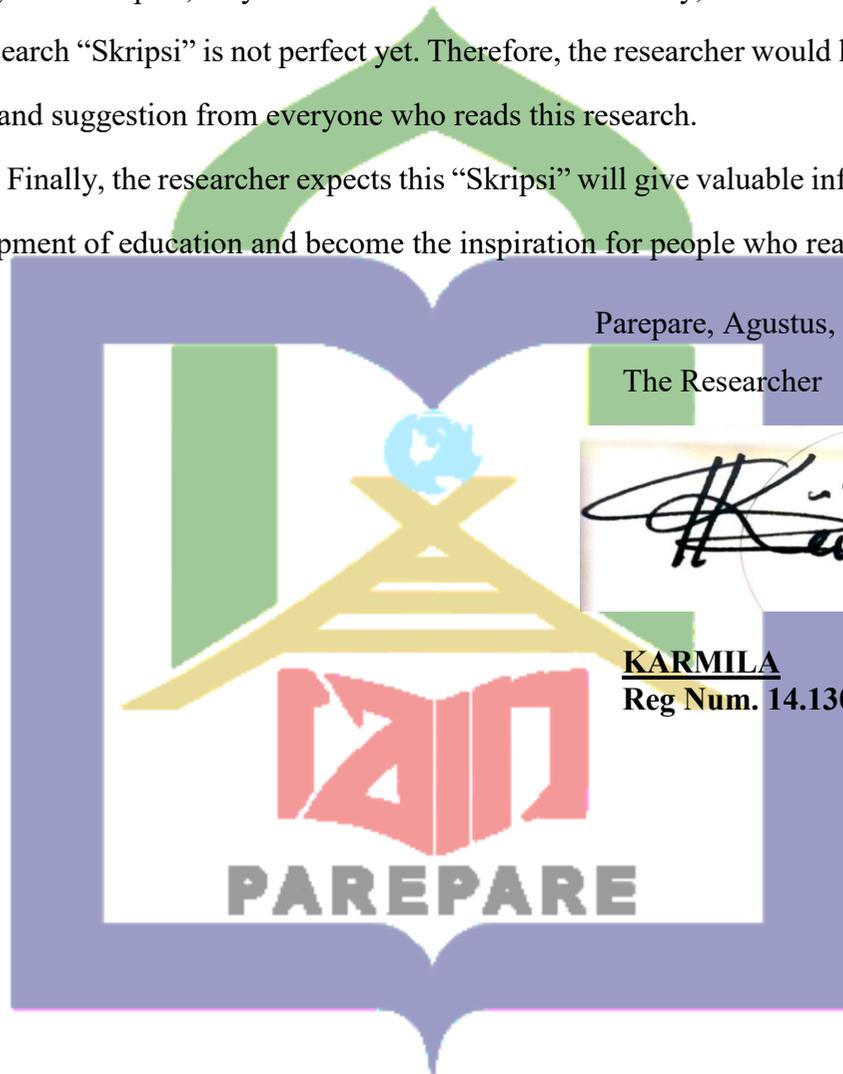

Finally, the researcher expects this “Skripsi” will give valuable information for development of education and become the inspiration for people who read it.

ABSTRACT

Karmila. *The Correlation between Students' learning style and students' reading comprehension at the tenth grade of MA DDI Takkalasi. English Department of Tarbiyah Faculty, State Islamic Institute (IAIN) Parepare (Supervised by Anwar and Hj. Nanning). This study is to see the correlation between students' learning style and students' reading comprehension at the tenth grade of MA DDI Takkalasi.*

This research aims at: To see the correlation between students' learning style and reading comprehension at the tenth grade of MA DDI Takkalasi. The result of the research are useful for the teacher and students. The teacher will aware that it is important to teach learning style to the students before asking to reading comprehension and the students also can be easier to answer the descriptive text when they master in reading comprehension.

The subject of this research is X MIA B class which is consisted of 18 students. The sample was taken by using purposive sampling. The design in this research was infrensial quantitative correlation by giving queationnare and multiple choise. Getting the score of the questionnaire and multiple choise. It aimed to know is there any correlation between students' learning style and reading comprehension at the tenth grade of MA DDI Takkalasi.

The result in this research was indicated that there was correlation of the students' learning style and their reading comprehension to descriptive test by seeing the calculating scores 3.791. The critical value of the person r with 5% got the significance 0.468. It means that the result of the computation is greater than critical value. So, the researcher concluded that the correlation between learning style and reading comprehension is highly significance. The alternative hypothesis (H_a) is accepted.

Keywords: Learning Style and Reading Comprehension.

CHAPTER I

INTRODUCTION

1.1 Background

English as the first international language studied in Indonesia. It is studied from elementary school until university. Even some institution used English as compulsory subject to mastery orally and in written. Many book written in English have spread widely among the people and use as reference for the take of studying acquiring in information and having pleasure. At school, English at studied as a subject, students learn English as a language with all its supporting components such as reading, writing, listening and speaking have to be developed to the second year school of junior high school, because English is not a new thing for them. The four skills are related one other, but the first aspect have to be taught to the students is reading skills the fact proves that the key of successful learning depend on beguile of the ability to comprehend reading material.

The people all over the world cannot deny that the globalization will have a big impact on the nations of the world Indonesia as one of countries in the world cannot avoid from the influence of globalization. Indonesia must be ready to face the challenges of globalization by improving its human resources and maintaining stable condition of the century. One of requirements in facing the challenges of the globalization is mastering English as an International language.

In Indonesia English is a foreign language. Learning a foreign language is an integrated process that the learner should study the four basic skills. We use it to understand our world through listening and reading and to communicate out feelings, needs, and desired through speaking and writing. By having more knowledge about

language skill students have much better chance for understanding and being understood and getting what we and need from around us.

By mastering English students will get a lot of information, so it is very important to learn English. Through English, students can also do communication with other people in the world and we can get knowledge.

Learning is a relatively permanent change in a behavioral tendency and is the result reinforced practice¹. So, the component of learning such as learning are acquisition or getting, retention of information or skill, and a change in behavior. And there are two kinds of learning in our life, those are everyday learning and school learning. In everyday learning has real context, as the first hand, come easily and is self-motivation and come from cooperation and sharing. But in school learning. It has contextualized, as the second hand, doesn't come easily and needs motivating and tends to be individualistic.

The success of teaching-learning process is not only determined by how the teachers teach, but also, most importantly and principally is determined by how the student learn. Language learning style is one of the main factors that help determine how the students learn a second or foreign language. However, the student have different personalities so they learn in many ways or styles.

The concept of learning style has been defined by various solar. Pritchard stated that is “an individual’s preferred means of acquiring knowledge and skills”. It is “a person’s typical approaches learning activities and problem solving”.²Liu defined it as

¹Kimbe and and Garmezy, *Principles of Language Learning and Teaching 3rd edition*, p.7

² Pritchard,, A., *Ways of Learning: Learning Theories and Learning Style in the Classroom. Second Edition.*

“approaches to learning which refer to information processed in a preferred way in accordance to learner’s habitual characteristics”.³

The above definitions asserted that learning style have some characteristic: each learner has a preferred way of learning. Understanding this idea includes realizing that is it misleading to limit a person’s learning style to only one certain type or category. Human beings naturally possess different learning style are capable of learning in almost any style. However, they apply the one which they feel most comfortable. Pritchard said that, the terms, approach, way the preference which have been used to refer to environmental, affective and physical conditions under which a student is likely to learn.⁴

Teaching English should deal with the four skills namely; reading , writing, speaking, and listening. These skills are equally important. They should be learned and mastered in equal degrees. Among the four skill, reading gets greater attention than the other skills. The fact shows us that most people themselves to be able to read as well as to understand to English materials, and may scientific books are written in English.

In studying English, reading most important of learning skills. One can acquire for success and enjoyment through our life. It is an integral part of our personal and working lives. Consider how much time every day is spent reading letter , books, menus, direction, or sign. The better you read the more you will success in studying or working and enjoying the time you spend with books.

³ Liu, H.. *A Study of the Interrelationship Between Strategy use, Listening Proficiency levels, and Learning style*, p. 84-104

⁴ Pritchard, A., *Ways of Learning: Learning Theories and Learning Styles in the Classroom Second Edition*

Among the four skills reading gets greater attention than the other skills. The fact should us that most people prepare themselves to be able read as well as to understand through English reading materials, may scientific books are written in English, and trough reading, people can improve their knowledge.

Reading teacher should be concerned with finding and creating a body of material that particular students might find interesting to read. The technique is necessary to be developed especially in improving reading comprehension successful of the students, so, the suitable methods and material must be selected to be taught.

Realizing the importance of the teaching of reading comprehension, the researcher introduce a method to get the students successful in reading namely learning style and reading comprehension.

Most student encounter problem in English reading the techniques of English teaching are necessary to be developed especially in improving reading skill because the techniques of teaching influence and can half students' success.⁵So, the English teacher must be creative in the classroom by using suitable methods, and materials to teach.

The phenomenon is often occurs in the world of education is there are on the students itself, but in see also from the way the teacher who gave learning to students. And then, in the learning process teachers should being able to find out the extent understanding of the students against the style of study. Because in the reading the goal is understand the contents of reading so get achievement studied at school.

Based on this questation, researcher can take a conclusion that finding the topic (main idea) in paragraph is basic to comprehend the content of reading.

⁵Ekawati, Astry. *Improving The Reading Skill of The Second year Student of SMA Negeri 1Barru Through Suggestopedia Method*. (Makassar: FBS UNM, 2007). P.25

Based on the explanation above the researcher carries out a research under the title: “ The Correlation between Students’ Learning Style and students’ Reading Comprehension at the Tenth Grade of MA DDI Takkalasi Kab.Barru”.

1.1 Problem Statement

Based on the statement above, the writer state that the problem of the research as follow;

- 1.1.1 What is the students’ learning style at the tenth grade of MA DDI Takkalasi ?
- 1.1.2 What is the students’ reading comprehension at the tenth grade of MA DDI Takkalasi ?
- 1.1.3 Is there correlation between learning style and reading comprehension at the tenth grade of MA DDI Takkalasi ?

1.2 The Objective Of the Research

- 1.2.1 To know the students’ learning style at the tenth grade of MA DDI takkalasi.
- 1.2.2 To know the students’ reading comprehension at the tenth grade of MA DDI Takkalasi.
- 1.2.3 To find out the correlation between students’ learning style and reading comprehension.

1.3 The Significant of Research

- 1.3.1 For the teacher

This research is to half the teachers to be aprofesional in english teaching, in they can make the students to know about the material before giving the text to the students to avoid confusing happens to the them.

- 1.3.2 For the students

This research can be motivate the students to learn reading seriously so they will be easier to understand the english text.

1.3.3 For the Reseachers

This expected to give a new knowledge of the further of reseacher to do the better research of teaching and learning cases.

CHAPTER II

REVIEW OF RELATED LITERATURE

2.1 Some Pertinent Ideas

2.1.1 The Concept of Learning Style

The identification of student learning style is very important in order to increase students' reading comprehension in English. So in this research it will be informed about definition of learning style, type of learning style and the advantages of learning style.

2.1.1.1 Definition of Learning style

Learning is a very complex process. A lot of people regarded that learning is to master the knowledge or science. So far event, there were people said that learning is to entread the science. A few of psychologist have conclude to make clear the meaning of learning it self. To get more explanation, the researcher will sow some professional idea about definition of learning and learning style.

Learning is a relatively permanent change in a behavioral tendency and is the result of reinforced practice'¹. It seems that the main purpose of learning is the change in behavioral changes experienced by learners. Even according to Ions Reece in the change of learning outcomes include more perfect things as students get great skills.

Learning is a system that aims to help the learning process learners, that contains a series of events in design, in an apartment in such a way to influence and support for the learning process of students who are internal.

Learning is translation of the word "*instruction*" in the language yunani called instructs or "intruder" that means convey mind, thus the meaning of instructional is

¹ Brown. 1980. *Principle of Language Learning and Teaching*. (Jakarta) p7.

convey thoughts or the idea that has been in this is meaningful the learning. Thus it can be understood that Learning is a process to change the behavior of someone from experience the changes are such as from not know to know, from unable to able and from not skillful to skillful.

Cronbach suggests that learning is shown by the change in behavior as a result of experience as a result of experience (learning as an activity which is indicated by a change in behavior as a result of the experience). Meanwhile, Geoch, said: “learning is a change in performance as a result of practice” (learning is a change in appearance as a result of practice).²

In other hand, learning is behaviors which have change because of learning are regard to authoritarian aspect in physical and psychological. The change which is mean is problem solving/set thinking, skill, training, savoir faire, habitual and attitude.³

From definition above, it is clear to understand that learning is process of selection information such as knowledge, skill, or attitude, obtained by study or education to make change for ourselves to be the better. Learning is process to change the behavior of someone from experience. The changes are such as from not know to know, from unable to able and from not skillful to skillful.

After explain describes of learning. The researcher will explain some definitions of learning styles. Among others.

Learning style are the general, broad approaches used to learn a subject. Joy M.Reid stated that “learning style are various approaches or ways of learning. According to Cornet, “learning style is a consistent pattern of behavior but with a

²Sardiman. *Interaksidan Motivasi Belajar Mengajar*, (Cet 1, Bandung) p. 22

³Purwanto Ngalim, 2003, *Psikologi Pendidikan*. (Cet II, Jakarta) p.17

certain range of individual variability style then are overall patterns that give general direction to learning behavior.” Learning style include an array of cognitive affective (emotional and attitudinal), and social aspects.⁴

Learning style refers to an individual’s natural, habitual, and preferred way of absorbing, processing, and retaining new information and skills. These learning style persist, regardless of teaching methods and content areas (see Kinchella, this volume). In this anthology, we divide the learning-style research into three major categories: cognitive learning styles, sensory learning styles, and personal it learning styles.

According to Adi W. Gunawan that learning styles is the way the like to do the activity of thinking, process and understanding the information.⁵ So learning styles show a variety of activities and the role of thinking as an attempt to understand an intonation, this opinion same with Sukardis’ opinion learning styles is a combination of between the way someone in absorb knowledge and how to set up and processing information or the knowledge that can be.⁶

Learning styles is the tendency to adapt certain strategy in his studied as a form of the answer to get approach to learn in accordance with the learn in class or school and of subject.

Based on some definitions above the researcher conclude that learning styles is the way students learn to recognize and understand the information through variety of approaches and stimulate received to create a strategy for learning and can influence the students learning outcomes.

⁴Joy M. Reid, *Learning Styles in The ESL/EFL Classroom*, p36

⁵Adi, W. Gunawan, IlmuTazbhy, *Definisi Gaya Belajar (online, Journal)*.

⁶Sukardi , *Progressive Learning, Journal*, www.booksc.com

Most experts agree that there are three basic learning styles as visual learning, auditory learning and kinesthetic learning.

2.2.1.2 The Types of Learning Styles

There are three main type of styles in which individuals are often categorized under when it comes to learning, as well as increase the ease in which the information is learned.

2.2.1.2.1 Visual Learners

Visual learners learn new skills by seeing and learn new information best through visuals. Using diagrams and other visual methods of learning are recommended for these types of learners and students that understand and learn best when information is presented to them visually.

2.2.1.2.2 Auditory Learners

Students that understand and learn best when information is presented to them in an auditory manner, hearing information helps these students internalize concepts taught.

2.2.1.2.3 Kinesthetic Learners

Students that understand and learn best when information is present to them kinesthetically. Using their hands or bodies helps these students experience the concepts taught. Children receive information through these three channels all they long and as children get older and develop, one channel will easily facilitate acquisition better than the other. While students can have a mixture of styles and learn in all of the ways mentioned above, each child will most likely have one style that is dominant for taking in new material in the classroom.

Now if we understand our own unique learning style, we are going to examine each learning style more closely and learn what steps we can take in other reading comprehension based on that learning style, so we can understand well about our type of learning and those type application in our daily life for studying. Application of our learning style type in our daily life is very useful to use. It can increase our skill for studying. Not only increase our skill but also to make our brain easy to learn. So our brain isn't stress.

2.2.1.3 Characteristic of Learning Style

2.2.1.3.1 Auditory Learner

They talk about what to do, about the pros and cons of a situation. They indicate emotion through the tone, pitch, and volume of their voices. They enjoy listening but cannot wait to get a chance to talk. They tend toward long and repetitive descriptions. They like hearing themselves and others talk.

They tend to remember names but forget faces and are easily distracted by sounds. They enjoy reading dialogue and plays and dislike lengthy narratives and descriptions. Auditory learners benefit from oral instruction, either from the teacher or themselves. They prefer to hear or recite the information and benefit from auditory repetition.

2.2.1.3.2 Visual Learner

They look around and examine the situation. They may stare when angry and beam when happy. Facial expression is a good indicator of emotion in the visual learner. They think in pictures and detail and have vivid imaginations. When extensive listening is required, they may be quiet and become impatient. Neat in appearance, they may dress in the same manner all the time.

They have greater immediate recall of words that are presented visually. Visual learners like to take notes. Relatively unaware of sounds, they can be distracted by visual disorder or movement. They solve problems deliberately, planning in advance and organizing their thoughts by writing them down. They like to read descriptions and narratives.

2.2.1.3.3 Kinesthetic Learner

They try things out, touch, feel, and manipulate objects. Body tension is a good indication of their emotions. They gesture when speaking, are poor listeners, stand very close when speaking or listening, and quickly lose interest in long discourse.

They remember best what has been done, not what they have seen or talked about. They prefer direct involvement in what they are learning; they are distractible and find it difficult to pay attention to auditory or visual presentations. Rarely an avid reader, they may fidget frequently while handling a book. Often poor spellers, they need to write down words to determine if they “feel” right.

2.2.2 The concept of Reading Comprehension

2.2.2.1 Definition of Reading Comprehension

Reading is one of the basic communicative skills, but it is a very complex process.⁷ Reading is an activity between a reader and writer, the writer sends his idea in the written symbols and the reader catches the idea from the printed pages. He adds that there is an essential interaction between language and thought in reading.⁸

Reading is the meaning interpretation of printed or written verbal symbol. Reading is a result of the interaction between the perception of graphic symbols that

⁷ Charles E, Merrill, 1988, *Principles and Practices of Teaching Reading*, p 3..

⁸ Cerrel, Th.I. L. Patricia and Dolme, *Interactive Approach to second Language Reading*, (New York: Cambridge University Press, 1988), p12

represents language and the reader's language skill and knowledge of the word in this process the reader tries to recreate the meaning intended the writer.⁹

After explain describes of reading. The researcher will explain some definitions of reading comprehension. Among others.

Reading comprehension is the ability to process text, understand its meaning, and to integrate it with what the reader already knows. Fundamental skills required in efficient reading comprehension are knowing meaning of words, ability to understand meaning of word from discourse context, ability to follow organization of passage and to identify the main thought of a passage, ability to answer questions answered in a passage, ability to recognize the literary devices used in a passage and to determine its tone and mood, and finally ability to determine writer's purpose, intent, and point of view, and draw inferences about the writer.¹⁰

Reading comprehension is variously defined by both practice and theory. Reading comprehension is sometimes defined by comprehension tests. If a test says it measures comprehension, whatever that test happens to measure becomes what comprehension is supposed to entail.¹¹

Reading comprehension is the process of making meaning from text. The goal, therefore, is to gain an overall understanding of what is described in the text rather than to obtain meaning from isolated words or sentences.

⁹ J. Albert Harris, Th.I. Sipay, and R.Edward, 2001, *How to Increase Reading Abilit*, p.8

¹⁰Davis,F. B. *Psychometrika* (1944) [https:// doi.org/10.1007/BF02288722](https://doi.org/10.1007/BF02288722).

¹¹ Brown and Company (Canada) 1979, *Teaching Reading*, p. 133

2.2.2.2 Kinds of Reading Comprehension

According to Daulags brown that in teaching reading there are three kinds of reading that can improve skills of reader, they are reading aloud, silent, reading and speed reading.¹²

a) Reading aloud

reading aloud is an important thing to do in reading where the students who are knows as reader are required it read aloud to practice their tongue but have to pronounce every word found in the text. The main point focus of reading is not catching their ideas every word in a sentence.

b) Silent reading

Silent reading is frequently practice by a reader who wants to comprehend text in reading process. Silent reading means reading by gears, where no voice expressed. This type of reading aims it find out the word and how to express the word as in reading aloud. Reading silent needs a reader should have a full concentration.

c) Speed reading

Speed reading is used to improve speed comprehension in reading. This must run side by with the main purpose of reading a story or newspaper or narrative will be different from the reading of scientific material.

2.2.2.3 Reading comprehension skill

Dolmer, stated that the skill of reading comprehension can be categorized into twelve skills, namely;

¹²Daulands, Brown. H, *Principle Of Language Learning and Teaching*, (San Francisco: San Francisco Satate Universit, 1993) P.283

- 2.2.2.3.1 Gaining the word meaning. It deals with the skill to find and interpret the intended meaning.
- 2.2.2.3.2 Identifying details. It deals with the skill to find some explicitly stated pieces of information.
- 2.2.2.3.3 Identifying sequence. It deals with the skill to identify the sequence in which components occur or are placed.
- 2.2.2.3.4 Identifying cause-effect relationship. It deals with the skill to determine the reason for the occurrence of an event or an action.
- 2.2.2.3.5 Identifying main idea. It deals with the skill to identify the central thought of a paragraph.
- 2.2.2.3.6 Making inference. It deals with the skill to formulate an image to the information that is not explicitly stated in the passage.
- 2.2.2.3.7 Making generalization and conclusion. It deals with the skill to make generalization then conclude it and infers the relationship among separate situations or events.
- 2.2.2.3.8 Identifying tone or mood, it deals with the skill to recognize the authors' attitude and the emotion that he or she intends to the readers.
- 2.2.2.3.9 Identifying theme. It deals with the skill to recognize the moral or concept that the passage clarifies to the readers.
- 2.2.2.3.10 Identifying the characterization. It deals with the skill to determine the personality traits and feelings of a character in a selection.
- 2.2.2.3.11 Identifying fact-fiction and opinion. It deals with the skill to determine which passage that presents actual condition and the one that reflects the personal feelings of the author.

2.2.2.3.12 Identifying propaganda. It deals with the skill to identify the existence of an authors' biased opinion in the passage.¹³

Based on the explanation above, we have learned to know the factors that affect the reading comprehension of students'.

2.2 Previous Research Finding

The importance of learning style make many researchers explored and reported the students' achievement in finding the different ways to learn. They have proved that to find students' learning style is the best way for them to study. Some of their researches as follow:

2.2.1 The information about the diversity of students' learning style preferences is essential for English language teaching and learning since it can be used either by teachers to develop an appropriate treatment or by the students themselves to know their strengths in mastering English as a second language.¹⁴

2.2.3 According to Ellis Learning style, motivation, aptitude and also age". Those dimensions are assumed to be significant contributors that determine the success or failure in acquiring English language learning. In this research, the writer focused on learning style of the students as one of the some dimensions to be considered as determinant to the students' reading comprehension¹⁵

2.2.4 Pang state that "reading is about understanding written text. It is a complex activity that involves both perception and thought". Reading consist of two related processes such as word recognition and comprehension. Word recognition reerts to the process of perceiving how written symbols correspond to one's spoken language.

¹³Dolmer, *Interactive Approach to Second Language Reading* (New York: Combridge University Press, 1988), p. 22

¹⁴EnitaSholikatin, "A Study on Students' Learning Style Prefences in Learning English at Smp Negeri 4 Malang", (FakultasSastra, Um, 2008). P 1

¹⁵ Ellis, Rod. *Second Language Acquisition*. New York: Oxford University Press. (1985).

Comprehension refers to the understanding what is being said or read. When it comes to reading, it is an active process that should be developed if a learner to become a prurient readers¹⁶.

2.2.4 Irwan Ro'iyal Ali in his research "*The correlation between students vocabulary mastery and reading comprehension*" conclude that there is significant correlation between students' vocabulary mastery and reading comprehension.¹⁷

Based on the research finding above, the researcher concludes that learning styles are considered to have important role in the process of teaching and learning activities because of individual reading comprehension is influenced by various factors, one of which is a style of learning. If someone is able to process what, where, when, and how learning styles, learning will be more effective and efficient so that it can maximize the learning comprehension because of the right learning style will be able to increase the student Reading Comprehension.

The differences on the previous research finding above with my research is previous research finding above examines about learning style in general while my research more specific examines about reading comprehension.

2.3 Conceptual Framework

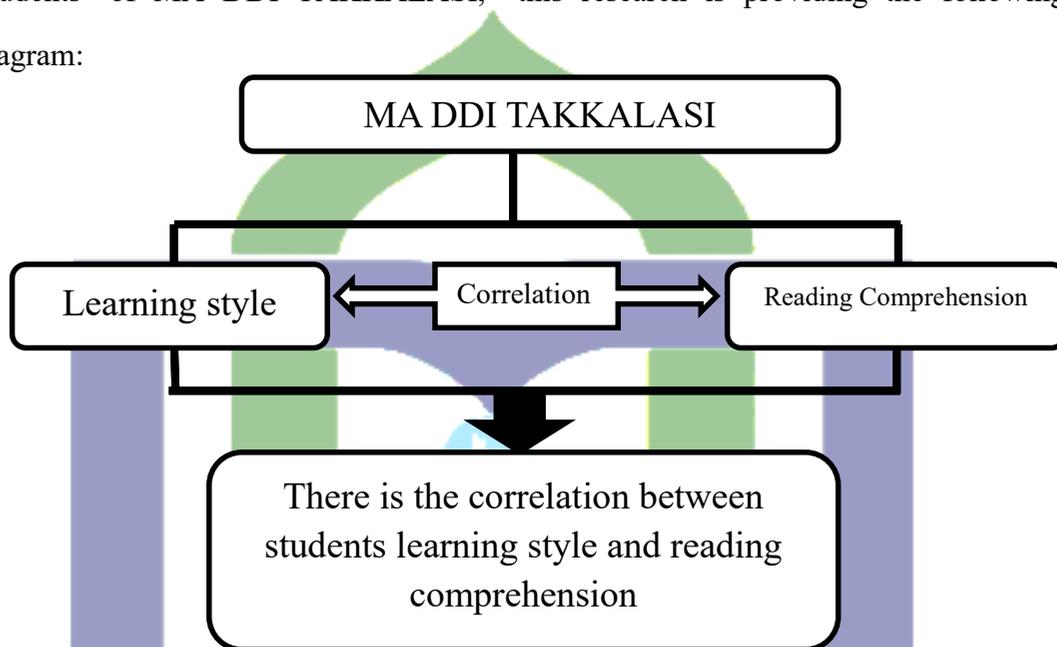

Conceptual Framework is overview of the pattern of relationship between variables in a coherent whole which is a description of the focus of research.¹⁸ These framework are intended as the basis of systematic thinking and reduce the problems discussed in this research.

¹⁶ Pang, Elizabeth, at all. *Teaching Reading*. Switzerland: International Academy Of Education, (2003).

¹⁷ Irwan Ro'iyal Ali, *The Correlation Between Students Vocabulary Mastery and Reading Comprehension*. (Campus STAIN Parepare, 2016).

¹⁸ Tim Penyusun, *Pedoman Penulisan Karya Tulis Ilmiah* (Makalah Dan Skripsi), h.26

To further facilitate readers to understand this researchers made a chart of conceptual framework in accordance with the title of “The Correlation between Students’ Learning Style and Students’ Reading Comprehension at the Tenth Grade Students’ of MA DDI TAKKALASI,” this research is providing the following diagram:

2.4 Hypothesis

Hypothesis give the way in collecting the translation data, hypothesis can show the researcher which procedures are can be followed and what kinds of data must be collected, hypothesis also meant as temporary assumption that need the fether proven by the researches. This is in accordance with the opinion revealed by Prof. DR. S. Nasution, MA, that Hypothesis is a tentative statement that is conjecture about what is observed in efforts to understand. ¹⁹

¹⁹ Prof. Dr, S, Nasution, MA, *Penelitian Kuantitatif*,

The researcher proposed the Hypothesis for this research, as follow:

H_0 = There is no correlation between students learning style and students reading comprehension at the Tenth Grade of MA DDI Takkalasi.

H_a = There is correlation between students learning style and students reading comprehension at the Tenth Grade of MA DDI Takkalasi.

2.5 Variabel and Operational definition

2.5.1 Variable

In this research, there are two variables, consist of independent variables dependent variable. The independent variable is students' learning style and dependent variable is students' reading comprehension.

2.5.2 Operational Definition

2.5.2.1 Students' learning style is type that shows the characteristics of the learning style of the students;

a). Visual Learners is Visual learners learn new skills by seeing and learn new information best through visuals.

b). Auditory Learners is students' that understand and learn best when information is presented to them in an auditory manner, hearing information helps these students internalize concepts taught.

c). Kinesthetic Learners is students' that understand and learn best when information is present to them kinesthetically

2.5.2.2 Students' reading comprehension is the ability to process text, understand its meaning, and to integrate it wit what the reader already knows.

CHAPTER IV FINDING AND DISCUSSION

This chapter contained finding and its discussion. The finding of the research covers the result of data collected and analyzed through learning style and reading comprehension. The data will be discussed in this section below.

4.1 Finding

The findings of this research are taking by learning style and reading comprehension. To find out the result of this research, the researcher had given questionnaire to the students' of the X MIA B at the tenth grade of MA DDI Takkalasi consists of 18 students. The first quistionnaire was learning style consists of 30 numbers in quistionnaire and the second test was reading comprehension the descriptive text. The result of the tests are described in the tabulating scores.

4.1.1 The Result of questionnaire

The researcher had been known the students' learning style by looking the scores of quistionnaire. The researcher had given the test to the 18 students of X MIA B at the tenth grade of MA DDI Takkalasi as the sample of this research.

3	Kinesthetic	457
Total		1303

Mostly students prefer the visual learning style, based on the data above. This is because the colors, images and other things from the tools of learning are attractive for the students and with this stimulation that provide by teacher will make students be more excited and certainly help them to concentrate more in receiving lessons. Similarly, kinesthetic learning style like by students especially at the last lesson in the afternoon. This learning style will help students to eliminate their sleepiness and keep them excited to learn and receive lesson in an interactive way. Instead, auditory learning style is less like by students because this learning style is considered very boring where students will only sit quietly and just listen to the teacher dictate and explain during all the time in learning process.

4.1.2 The result of students' multiple choice descriptive test

The researcher had been known the students' multiple choice descriptive test text by looking the scores of multiple choice descriptive test. The researcher had given the descriptive text for the students to multiple choice. The result of the students' test as following:

Table 4.8 Score in multiple choice descriptive test

No	Students	Descriptive text			Classification
		Score	Integrity	Value	
1.	NURAENI	60	2.4	C+	Enough
2.	ANDI NURUL YASMIN	50	2	C-	Enough

		1,85-2,17		
		1,51-1,84		
4	Poor	1,18-1,50	-	-
		1,00-1,17		
Total			18	100

From the table above, the researcher found the result of students' descriptive text test. There were 7 (38.88%) out of 18 students got excellent, 5 (27.77%) out of 18

students got good classification, 6 (33.35%) out of 18 students got enough. It can be concluded that most of students got good and excellent scores so it means several of them could descriptive text well although there were still students cannot multiple choose the text as well as possible.

4.1.3 The result of calculating between learning style and reading comprehension

After giving the questionnaire and multiple choice to the students, the researcher calculated both of them and it can be seen in the table as following:

Tabel 4.10 Calculating Scores of learning style and reading comprehension

No	X	Y	XY	X ²	Y ²
1.	27	60	1.60	729	3.600
2.	25	50	0.5	625	2.500

16.	28	60	1.680	784	3.600
17.	29	90	2.610	841	8.100
18.	31	70	2.170	961	4.900
N= 18	$\sum X=512$	$\sum Y= 54.4$	$\sum XY$ =30.033.070	$\sum X^2=14.650$	$\sum Y^2=5.0017$

Where:

$$N = 18$$

$$\sum X=512$$

$$\sum Y=544$$

$$\sum XY=30.033.070$$

$$\sum X^2=14.650$$

$$\sum Y^2=5.0017$$

r.....?

$$r = \frac{N \sum xy - \sum x \cdot \sum y}{\sqrt{(N \sum x^2 - \sum x^2)^2 (N \sum y^2 - \sum y^2)^2}}$$

$$r = \frac{(18)(30.033.070) - (512)(544)}{\sqrt{(18)(540.595.260) - (512)^2} \cdot \sqrt{(18)(5.0017) - (54.4)^2}}$$

$$r = \frac{540.595.260 - 278528}{(9.730.714.680 - 262144) \cdot (900.306 - 295936)}$$

$$r = \frac{540.316.732}{\sqrt{9.730.452.536} \cdot \sqrt{604370}}$$

$$r = \frac{540.316.732}{(98.643)(777.41)}$$

$$r = \frac{540.316.732}{7.668.605.463}$$

$$r = 70.460.$$

Analysis data infrensial quantitative From the results of the r 70.460 and $r =$ tabel 5 % 0.468 is a combination of the questionnaire score and text descriptive.

Tabel 4.11 the correlation between students learning style and reading comprehension.

r = value	r = table
	5%
70.460	0,468

It can be concluded that *r-value* is greater than *r-table*, it means that alternative hypothesis is accepted so there is correlation between students' learning style and reading comprehension. The students' who got high scores in past tense means they could answer the questionnaire well and the students who got low scores in multiple choice from descriptive text.

4.2 Discussion

From the result above, it was found that r_{xy} is 70.460. Based on the *r* table with $N = 18$ and significance 5% is 0.468 so, the r_{xy} is higher than critical value. It was very clear there is correlation both of the variables. This fact indicated that the students' learning style give contribution to the students' reading comprehension.

4.2.1 The Result of Students' Learning Style

To get the result of the students' learning style, the researcher gave 30 numbers questionnaire. The test consisted of premise and several alternative answers. To find out the scores of the test, the researcher checked the answers of the students and correct answers divided the maximal scores and time 4 so, the scoring of each students were known.

From the sample 18 students, in learning style there were 8 got visual learner. 7 students got auditory learner and 3 students got kinesthetic learner.

4.2.2 The Result of Students' Reading Comprehension

To get the result of the students' reading comprehension, the researcher gave 10 numbers multiple choices about descriptive text to the students. The test consisted of premise and several alternative answers. To find out the scores of the test, the researcher checked the answers of the students and correct answers divided the maximal scores and time 100 so, the scoring of each students were know.

From the sample 18 students, in reading comprehension there were 7 got excellent. 1 students got 100 and 6 students got 90. There were 5 got good classifications. 3 student got 70 , and 2 others got 80 . There were 6 students got enough. 1 student got 50 and 5 student got 60.

From the result above, the researcher concluded that most of the students of class X MIA B have mastered reading comprehension although several of them are still low in multiple choice. After giving the multiple choice to the students, the researcher gave them the descriptive text to answer.

The researcher did the treatment on Monday 1st, at the meeting the researcher had been prepared the questionnaire and multiple choice to give the students for answering. The day before that day, the researcher had been explained to the students what they would do for tomorrow so, the students would not be confused how to answer the test. The researcher gave the questionnaire as the first test then the researcher gave the multiple choice as the second test so, in the same day the students did two tests. After that, the researcher took all the students' test to get the scores.

From the scoring of the two tests, It was very clear that good learning style result good questionnaire and multiple choice. The students have to learn and understand well the learning style reading comprehension.

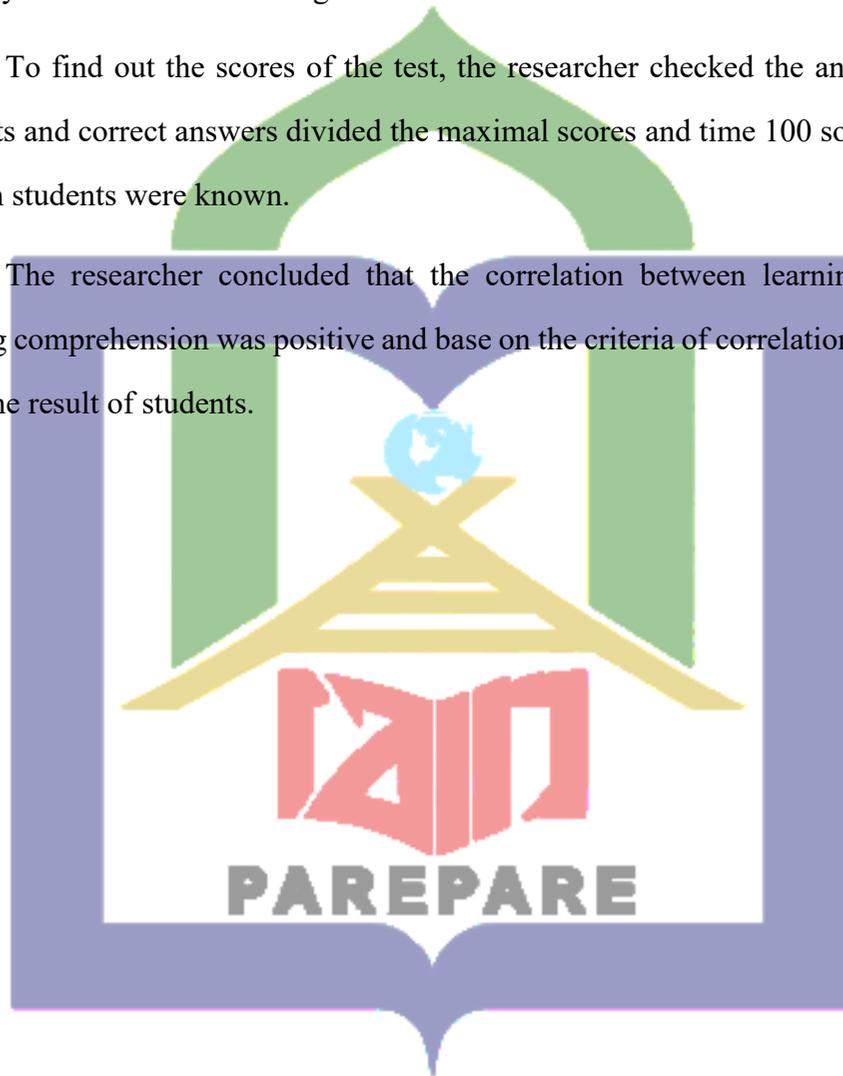

It was found that the students who got higher scores in reading comprehension, they also got high score in questionnaire. In contrast, the students who got low score in learning style, they also got low scores in multiple choice. It was happened because the students who did not understand the verb form of descriptive text was difficult to answer the text that used descriptive text.

4.2.3 Correlation Between Learning Style and Reading Comprehension

From the result of students, the researchers concluded that students at the tenth grade of MA DDI Takkalasi were more into the visual learner learning style, and from the sample 18 students, in learning style there were 8 got visual learner. 7 students got auditory learner and 3 students got kinesthetic learner.

To find out the scores of the test, the researcher checked the answers of the students and correct answers divided the maximal scores and time 100 so, the scoring of each students were known.

The researcher concluded that the correlation between learning style and reading comprehension was positive and base on the criteria of correlation coefficient, from the result of students.

CHAPTER V

CONCLUSION AND SUGGESTION

This chapter presents the conclusion and suggestion of the research about the correlation between students' learning style and students' reading comprehension.

5.1 Conclusions

Based on the result of data analysis and the discussion of the result in previous chapter, the researcher concluded that the students learning style of MA DDI Takkalasi are categorized that students learning style are different, some are visual learners with score 623, auditory learners with score 572 and kinesthetic learners with score 234, so, the conclusions from their learning style that students are more inclined to visual learner.

To get the result of the students' reading comprehension, the researcher gave 10 numbers multiple choices about descriptive text to the students. The test consisted of premise and several alternative answers. To find out the scores of the test, the researcher checked the answers of the students and correct answers divided the maximal scores and time 100 so, the scoring of each students were know.

From the sample 18 students, in reading comprehension there were 7 got excellent. 1 students got 100 and 6 students got 90. There were 5 got good classifications. 3 student got 70 , and 2 others got 80 . There were 6 students got enough. 1 student got 50 and 5 student got 60.

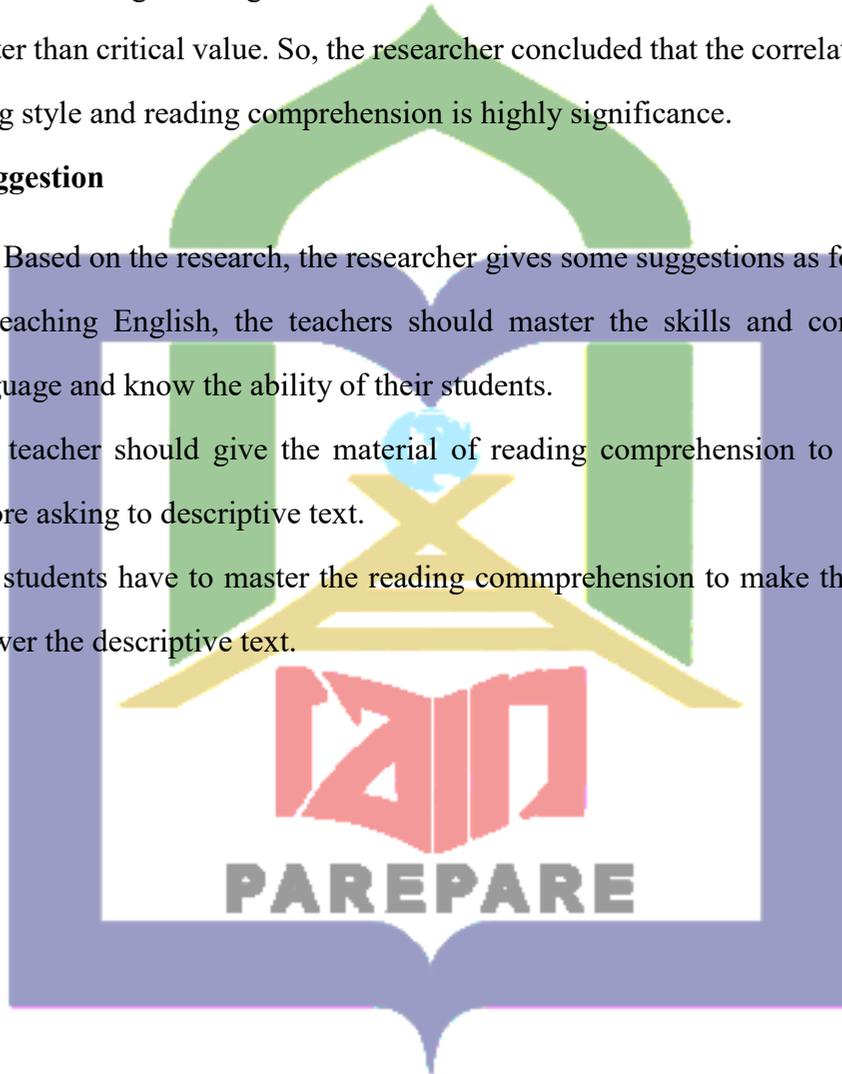

From the result above, the researcher concluded that most of the students of class X MIA B have mastered reading comprehension although several of them are still low in multiple choise. After giving the multiple choise to the students, the researcher gave them the descriptive text to answer.

So, the researcher concluded that, there is a correlation between students' learning style and reading comprehension. There is a significant correlation both of them by seeing the result of the calculating scores 70.460. the critical value of the person r with 5% got the significance 0.468. it means that the result of the computation is greater than critical value. So, the researcher concluded that the correlation between learning style and reading comprehension is highly significance.

5.2 Suggestion

Based on the research, the researcher gives some suggestions as follow:

1. In teaching English, the teachers should master the skills and components of language and know the ability of their students.
2. The teacher should give the material of reading comprehension to the students before asking to descriptive text.
3. The students have to master the reading commprehension to make them easier to answer the descriptive text.

THANKSGIVING

Thanksgiving Day is a legal holiday in the United states on the fourth Thursday of November in Canada, Thanksgiving falls on the second Monday in October. Most people celebrate Thanksgiving by gathering with family or friends for holiday feast.

Thanksgiving was first celebrated by pilgrims and Native Americans in colonial New England in the early 17th century. The actual origin, however probably traces to harvest festivals that have been traditional in many parts of the world since ancient times. Today, thanksgiving is mainly a celebration of domestic life centered on the home and family.

At the thanksgiving, Americans try to remember their ancestors, those are the pilgrims who inhabit the North America land. Thanksgiving parades often feature children dressed in pilgrim costume, complete with tall hats, dark clothes, and shoes. With large colored buckles.

Many of the images commonly associated with thanksgiving are derived from much older traditions of celebrating the autumn harvest. For example, the cornucopia (a horn-shaped basket overflowing with fruits and vegetables), is a typical symbol of thanksgiving. Many communities also decorate their churches with fruits, flowers and vegetables at thanksgiving, as European communities have for centuries during the autumn harvest seasons.

In keeping with the idea of celebrating a plentiful harvest, preparing and eating a large meal is a central part of most thanksgiving celebrations, thanksgiving menus usually include Turkey, Cranberry Sauce, Squash, Mashed Potatoes, sweet potatoes and pumpkin pie. These simple foods recall the virtues of the pilgrims additionally, most of these foods are native to North America, emphasizing the natural generosity that greeted early settlers in their adopted traditional holiday menu to fit their own

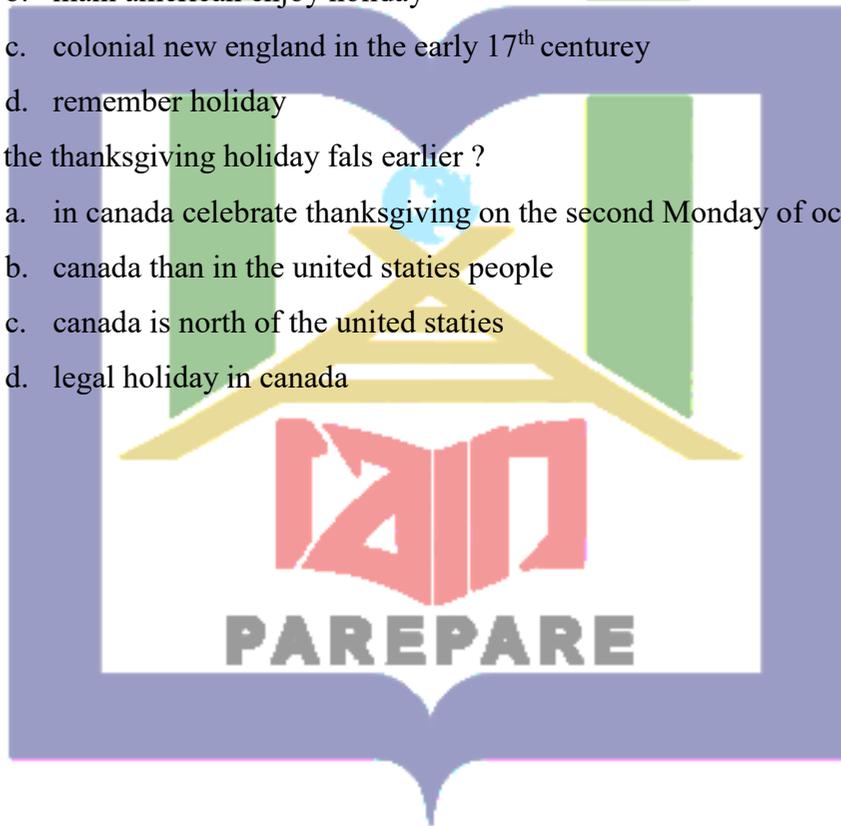

tastes. For example, many Italian American thanksgiving meals include Italian specialities, such as pasta and wine.

Many Americans enjoy their holiday meal watching football games on television. Traditionally, two nation football league (NFL) teams. The detroit lions and the Dallas cowboys, hostages on thanksgiving day. These holiday games have made football an American thanksgiving tradition.

Thanksgiving is also a legal holiday in canada. Because Canada is north of the United states, its harverst comes earlier in the year. So, the thanksgiving holiday falls earlier in Canada than in the United states people. In Canada celebrate thanksgiving on the second Monday of October.

1. What is American try to remember their ?
 - a. Pilgrims
 - b. Children
 - c. Ancestors
 - d. Clothes
2. When was thanksgiving was first celebrated by ?
 - a. Americans and Indonesian
 - b. Pilgrims and Indonesian
 - c. Pilgrims and Native Americans
 - d. Native and indonesian
3. Why does a child usually dress in pilgrim costume ?
 - a. Because American remember their preyers
 - b. Because American remember their priest
 - c. Because American remember their sin
 - d. Because American remember their ancestor
4. Why Canada celebrated thanksgiving ?
 - a. Because Canada is East of the United states
 - b. Because Canada is North of the United states
 - c. Because Canada is South of the united stated
 - d. Because Canada is jave of the United States
5. There are two National football league (NFL) teams are ?
 - a. Detroit Lions and Dallas Cowboys
 - b. Detroit Lions and Team Canada
 - c. Dallas Cowboys and Team America
 - d. Team America and Detroit icons
6. Thanksgiving is also a legal holiday in canada Because ?
 - a. Canada is north of the United states
 - b. Canada is in the United states on the fourth Thursday
 - c. Canada is tyfical symbol of thanksgiving
 - d. Canada is mainly a celebration of domestic life
7. What is the Thanksgiving Day is ?

- a. American try to remember their ancestors
 - b. Thanksgiving falls on the second Monday in October
 - c. legal holiday in Canada
 - d. legal holiday in the United States on the fourth Thursday
8. Most people celebrate Thanksgiving by ?
 - a. celebration of domestic life centered on the home and family

READING COMPREHENSION TEST

THANKSGIVING

Thanksgiving Day is a legal holiday in the United States on the fourth Thursday of November in Canada. Thanksgiving falls on the second Monday in October. Most people celebrate Thanksgiving by gathering with family or friends for a holiday feast.

Thanksgiving was first celebrated by pilgrims and Native Americans in colonial New England in the early 17th century. The actual origin, however, probably traces to harvest festivals that have been traditional in many parts of the world since ancient times. Today, Thanksgiving is mainly a celebration of domestic life centered on the home and family.

At Thanksgiving, Americans try to remember their ancestors, those are the pilgrims who inhabit the North American land. Thanksgiving parades often feature children dressed in pilgrim costume, complete with tall hats, dark clothes, and shoes. With large, colorful buckles.

Many of the images commonly associated with Thanksgiving are derived from much older traditions of celebrating the autumn harvest. For example, the cornucopia (a horn-shaped basket overflowing with fruits and vegetables), is a typical symbol of Thanksgiving. Many communities also decorate their churches with fruits, flowers, and vegetables at Thanksgiving, as European communities have for centuries during the autumn harvest seasons.

In keeping with the idea of celebrating a plentiful harvest, preparing and eating a large meal is a central part of most Thanksgiving celebrations. Thanksgiving menus usually include Turkey, Cranberry Sauce, Squash, Mashed Potatoes, Sweet potatoes, and pumpkin pie. These simple foods recall the virtues of the pilgrims. Additionally, most of these foods are native to North America, emphasizing the natural generosity that greeted early settlers in their adopted traditional holiday menu to fit their own tastes. For example, many Italian American Thanksgiving meals include Italian specialties, such as pasta and wine.

Many Americans enjoy their holiday meal watching football games on television. Traditionally, two national football league (NFL) teams, the Detroit Lions and the Dallas Cowboys, host games on Thanksgiving Day. These holiday games have made football an American Thanksgiving tradition.

Thanksgiving is also a legal holiday in Canada. Because Canada is north of the United States, its harvest comes earlier in the year. So, the Thanksgiving holiday falls

earlier in Canada than in the United states people. In Canada celebrate thanksgiving on the second Monday of October

SURAT KETERANGAN PENELITIAN
No.MA.15.12.18/SKP/DDI-Tk/VII/2018

Assalamu Alaikum, wr.wb.

Yang bertanda tangan dibawah ini Kepala Madrasah Aliyah Pondok Pesantren DDI Takkalasi :

Nama : **Hj. NURRAHMAH, HK. S.Ag**
NIP. : **197012272005012002**
Pangkat/Gol : **Pembina / IV. a**
Alamat : **Jl. H. Muh. Thahir Dani No. 21 Takkalasi Kec. Balusu Kab. Barru**

dengan ini menerangkan bahwa yang tersebut namanya dibawah ini :

Nama : **KARMILA**
Nomor Pokok : **14.1300.065**
Jurusan : **Tarbiyah dan Adab**
Program Studi : **Pendidikan Bahasa Inggris**
Pekerjaan : **Mahasiswi (S1)**
Alamat : **Panasa Desa Kamiri Kel. Takkalasi Kec. Balusu. Kab. Barru**

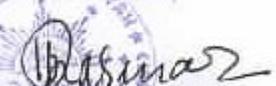

Telah melakukan penelitian di Madrasah Aliyah Pondok Pesantren DDI Takkalasi Kec. Balusu Kab. Barru berlangsung mulai dari tanggal 28 Juni s/d 28 Juli 2018 dalam rangka penyusunan Karya Tulis Ilmiah (KTI) /Skripsi /Tesis /Disertasi, dengan judul **THE CORRELATION BETWEEN STUDENTS' LEARNING STYLE AND STUDENTS' READING COMPREHENSION AT THE TENTH GRADE OF MA DDI TAKKALASI KAB. BARRU.**

Demikian surat keterangan ini diberikan untuk digunakan sebagaimana mestinya dan atas kerjasama yang baik diucapkan terime kasih.

Minal'ahil Muste'an Wa' Alathu' Tiklan.

Takkalasi, 16 Syawal 1439 H
29 Juli 2019 M

Kepala Madrasah,

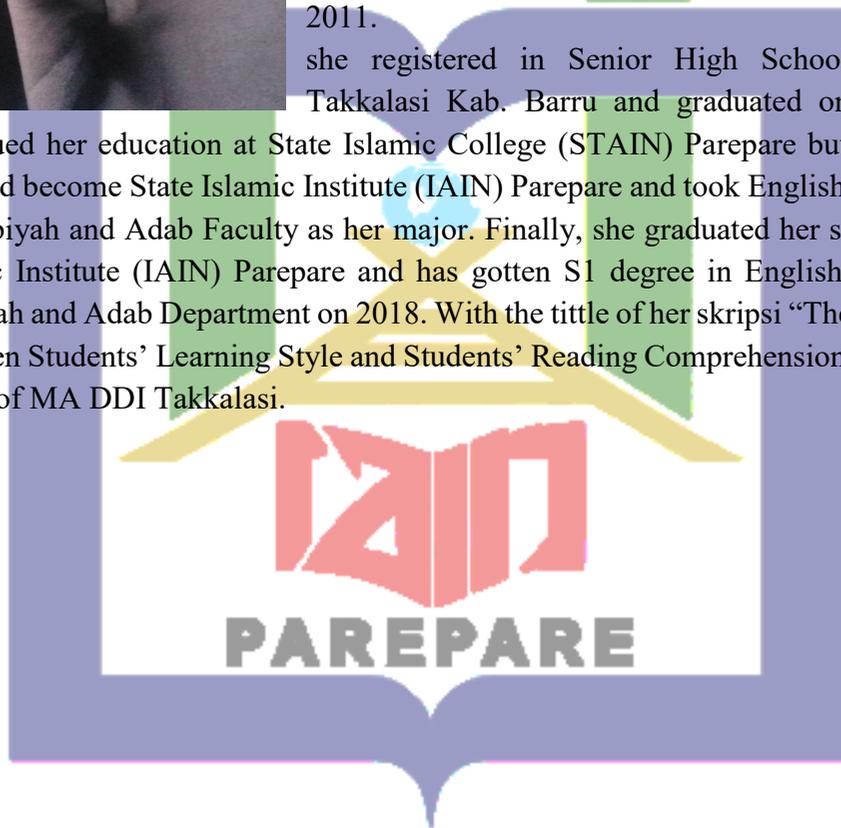

Hj. NURRAHMAH, HK. S.Ag
NIP. 197012272005012002

CURRICULUM VITAE

The researcher was born on September 30th, 1996 in Barru. She is the first child from two sister; she has one sister. Her father name is Syamsuddin S.E. and her mother name is Nurdawiah. Her educational background began 2002 in SDI Rumpiah, Kec. Balusu, Kab. Barru and graduated on 2008. She continued her study at SMP N 3 Balusu, Kab. Barru and graduated on 2011.

she registered in Senior High School MA DDI Takkalasi Kab. Barru and graduated on 2014. She continued her education at State Islamic College (STAIN) Parepare but now it was changed become State Islamic Institute (IAIN) Parepare and took English Department of Tarbiyah and Adab Faculty as her major. Finally, she graduated her study at State Islamic Institute (IAIN) Parepare and has gotten S1 degree in English Program of Tarbiyah and Adab Department on 2018. With the tittle of her skripsi “The Correlation Between Students’ Learning Style and Students’ Reading Comprehension at the Tenth Grade of MA DDI Takkalasi.

WAWANCARA

Judul Skripsi :

FAKTOR DOMINAN PERKARA CERAI GUGAT (ANALISIS PERKARA TAHUN 2017-2018 DI PENGADILAN AGAMA PAREPARE)

1. Dari perkara cerai gugat yang masuk di Pengadilan Agama Parepare, apa saja yang menjadi alasan dari kasus perkara cerai gugat ?
2. Dari banyaknya faktor perkara cerai gugat yang Bapak/Ibu sampaikan, faktor apakah yang paling dominan ?
3. Berapakah jumlah perkara yg diproses di Pengadilan Agama Parepare ditahun 2017-2018 ?
4. Bagaimana pandangan Bapak/Ibu terhadap banyaknya kasus cerai gugat yang diproses di Pengadilan agama Parepare, apakah semakin meningkat dari tahun 2017-2018 ?
5. Bagaimana cara Bapak/Ibu dalam proses persidangan atau tahap mediasi memberikan pemahaman pentingnya mempertahankan kehidupan rumah tangga ?
