## CHAPTER IV

## FINGDING AND DISCUSSION

This chapter consists of two sections, the findings of the research and discussion of the findings.

## A. Finding

After running the research to the second grade students of Madrasah Aliyah Negeri 1 Parepare, the researcher found the result of teachers' performance questionnaire and the test of speaking English as follows:

1. The result of teachers' performance questionnaire

Table 4.1: The classification, frequency and percentage of teachers' performance questionnaire

| Number | Classification | Frequency | Percentage |
| :---: | :--- | :---: | :---: |
| 1 | Strongly Agree | 12 | $31 \%$ |
| 2 | Agree | 20 | $53 \%$ |
| 3 | Neutral | 3 | $8 \%$ |
| 4 | Disagree | 3 | $8 \%$ |
| 5 | Strongly Disagree | 0 | $0 \%$ |
|  | Total | 38 | $100 \%$ |

Based on the table above, there was 12 student (31\%) agreed that the level of teachers' performance in MAN 1 Parepare is strongly agree, 20 students (53\%) agreed that their level of teachers' performance agree, 3 students ( $8 \%$ ) agreed that their level of professionalism is neutral, 3 student ( $8 \%$ ) agreed is disagree, 0 students ( $0 \%$ ) agreed their level of performance is strongly disagree.

Table 4.2 : The classification, score, frequency and percentage of students' speaking English skills (Y).

| Number | Classification | Score | Frequency | Percentage |
| :---: | :---: | :---: | :---: | :---: |
| 1 | Excellent | $91-100$ | 0 | $0 \%$ |
| 2 | Very Good | $81-90$ | 29 | $76 \%$ |
| 3 | Good | $71-80$ | 6 | $16 \%$ |
| 4 | Fair | $61-70$ | 3 | $8 \%$ |
| 5 | Poor | $51-60$ | 0 | $0 \%$ |
| 6 | Very Poor | $41-50$ | 0 | $0 \%$ |
| 7 | Failed | $0-40$ | 0 | $\%$ |
| Total |  |  |  |  |

Based on the data above can be conclude that from the evolution that have given by the influence teachers' can improve speaking English skills students of the second grade. This case can we see from the data there are in category of excellent $(0 \%)$, very good $(76 \%)$, good ( $16 \%$ ), fair $(8 \%)$, poor $(0 \%)$, very poor $(0 \%)$ and failed (0\%) in speaking English test.

From the explanatory description above, the writer can conclude that the influence of teacher performance toward students speaking english skills at the second grade of MAN 1 Parepare is currently good. Judging from the answers given by the respondents. From the above it proves that the teacher performance helps students and students of MAN 1 Parepare in increase speaking english skills.

After knowing the results of the questionnaire about the influence of teacher performance that has been distributed, it is analyzed and interpreted in the form of items. Then the process of calculating the correlation index between the teacher
performance (Variable X) and students' speaking english skills (Variable Y) was carried out.

The data were collected to by giving questionnaire to the sample which consists of 24 questions and result can be seen at the table presented below:

Table 4.3: The result of Distribution table of students' cognitive ability questionnaire (x) and result of fluency in speaking English (y)

The continuation of table 4.3

| Resp. Number | X | Y | $\mathrm{X} . \mathrm{Y}$ | $\mathrm{X}^{2}$ | $\mathrm{Y}^{2}$ |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | 75 | 83 | 6225 | 5625 | 6889 |
| 2 | 76 | 89 | 6764 | 5776 | 7921 |
| 3 | 60 | 78 | 4680 | 3600 | 6084 |
| 4 | 68 | 83 | 5644 | 4624 | 6889 |

| 34 | 82 | 89 | 7298 | 6724 | 7921 |
| 35 | 81 | 83 | 6723 | 6561 | 6889 |
| 36 | 79 | 89 | 7031 | 6241 | 7921 |

Continued......

The continuation of table 4.3

| Resp. Number | X | Y | $\mathrm{X} . \mathrm{Y}$ | $\mathrm{X}^{2}$ | $\mathrm{Y}^{2}$ |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 37 | 78 | 89 | 6942 | 6084 | 7921 |
| 38 | 82 | 89 | 7298 | 6724 | 7921 |
| $\boldsymbol{\Sigma}$ | 2962 | 3160 | 247689 | 234332 | 264464 |

2. Correlation Analysis (Pearson Product Moment )

Finding the correlation index " $r$ " product moment questionnaire based on the calculation table is known: $\mathrm{N}=38, \mathrm{x}=2962, \mathrm{y}=3160, \mathrm{x}^{2}=234332, \mathrm{y}^{2}=264464, \mathrm{xy}=$ 247689 so that the correlation value " $r$ " product moment can be searched with the following formula :
$\mathrm{r}_{\mathrm{xy}}=\frac{n \Sigma x y-(\Sigma X)(\Sigma Y)}{\sqrt{[n \Sigma x 2-(\Sigma x) 2][n \Sigma Y 2-(\Sigma Y) 2]}}$
$r_{\mathrm{xy}}=\frac{38(247689)-(2962)(3160)}{\sqrt{[38(234332)-(2962) 2\}\{38(264464)-(3160) 2\}}}$
$r_{x y}=\frac{9412182-9359920}{\sqrt{\{8904616-8773444\}\{(10049632)-(9985600)\}}}$
$r_{x y}=\frac{52262}{\sqrt{\{131172\}\{64032\}}}$
$r_{x y}=\frac{52262}{\sqrt{\{8399205504\}}}$
$r_{x y}=\frac{52262}{91647,17}$
$\mathrm{r}_{\mathrm{xy}}=0.57$
The following is the result of calculating the Pearson Product Moment correlation using SPSS 20 for windows.

## Table 4.4

## Correlation

|  |  | Teacher <br> Performance | Speaking <br> English Skills |
| :--- | :--- | ---: | ---: |
| Teacher Performance | Pearson Correlation | 1 | $.570^{\star \pi}$ |
|  | Sig. (2-tailed) |  | .000 |
|  | N | 38 | 38 |
| Speaking English Skills | Pearson Correlation | $.570^{\kappa \pi}$ | 1 |
|  | Sig. (2-tailed) | .000 |  |
|  | N | 38 | 38 |

**. Correlation is significant at the 0.01 level (2-tailed).

Based on the calculations obtained the correlation coefficient of variable X and variable Y of 0.570 , then the coefficient value of 0.570 was consulted in $\mathrm{r}_{\text {table }}$ with N $=38$ and a significance level of $5 \%$. The price of $\mathrm{r}_{\text {table }}$ is obtained at 0.320 , so the value of $r_{\text {count }}$ is greater than $r_{\text {table }}$, which is $0.570>0.320$.

So it can be concluded that the $\mathrm{H}_{\mathrm{O}}$ which reads: "teacher performance does not have an effect on Speaking English Skills at MAN 1 Parepare" is rejected. On the other hand, $\mathrm{H}_{\mathrm{I}}$ "teacher performance has an effect on Speaking English Skills at MAN 1 Parepare" is accepted.

To find out whether the influence is high or low, guidelines can be used in interpreting the correlation coefficient in Sugiyono's book contained in table 3.6 page 40.

Based on the calculation results obtained $\mathrm{r}_{\mathrm{xy}}=0.570$, it means that the teacher's performance has an effect on Speaking English Skills at MAN 1 Parepare is a moderate or sufficient correlation.

## 3. Simple Linear Regression

Hypothesis testing using Simple Regression Analysis. Test Simple regression aims to determine the effect of each variable, namely the effect of teacher performance (Variable X) on speaking English skills (Variable Y) by using the regression equation. To test the magnitude of the effect of teacher performance on speaking english skills, simple regression analysis was used using statistical analysis techniques contained in the SPSS 20 for Windows program. Answering the reseach question, "Is there any influence of Teacher's Performance toward Students' Speaking English Skills of MAN 1 Parepare ?"

| Model |  | Table 4.5 Hasil Uji Regresi <br> ANOVA ${ }^{\text {a }}$ |  |  | F | Sig. |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Sum of Squares | df | Mean Square |  |  |
| 1 | Regression | 547.958 | 1 | 547.958 | 17.348 | . $000{ }^{\text {b }}$ |
|  | Residual | 1137.095 | 36 | 31.586 |  |  |
|  | Total | 1685.053 | 37 |  |  |  |

Based on the results above, the value of $\mathrm{F}_{\text {count }}=17.348$ is obtained. while $\mathrm{F}_{\text {table }}$ $=4.11$ with a significance value $=0.000<0.05$. As for the criteria Ho is rejected if $\mathrm{F}_{\text {count }}>\mathrm{F}_{\text {table }}$ with $=0.05(5 \%)$ with a value of $17.348>4.11$.

So, the results of this simple regression test can be interpreted that $\mathrm{H}_{\mathrm{a}}$ which states that teacher performance has an effect on Speaking English Skills is accepted, and the consequence of $\mathrm{H}_{\mathrm{O}}$ is rejected.

Table 4.6 Coefficients

|  |  | Unstandardized Coefficients <br> Model |  |  | Standardized <br> Coefficients <br> Beta |  |
| :--- | :--- | ---: | ---: | ---: | ---: | ---: |

a. Dependent Variable: Speaking English Skills

Based on the results above, the X coefficient of 0.398 and a constant of 52.102 are obtained. Then, it can be described in the form of the relationship between Teacher Performance and Speaking English Skills in the form of the Regression equation $=52.102+0,398 \mathrm{X}$.

This shows that the teacher's performance increased by 1 point. So, speaking English skills will increase by 0.398 at a constant of 52.102 . In other words, the better the teacher's performance, the speaking English skills will increase.

## B. Discuccion

Data analysis in this study is the influence of teacher performance on students' speaking English skills at the second grade of man 1 Parepare. speaking english skills are the results that have been achieved by the teacher based on the standards and criteria that have been set. Teacher performance is one of the factors that influence the improvement of speaking English skills.

## 1. Teacher Performance at MAN 1 Parepare

Based on the data analysis that has been done, where the number of samples studied were 38 people representing each class with a total of 24 questions. Obtained from statistical processing data, the researcher can conclude that the teacher's performance at MAN 1 Parepare is in the sufficient category based on the average
value obtained. The factors that cause the teacher's performance at MAN 1 Parepare to be in the sufficient category, namely in the data collection instrument, a questionnaire with a total of 24 items, there is one item in which the average respondent chooses to strongly agree ( SS ) on the item so that it has a sufficient category.
2. Students' Speaking English Skills

Based on the data analysis that has been done, where the number of samples studied were 38 people representing each class with a total of 24 questions. Obtained from statistical processing data, the researcher can conclude that the students' English speaking skills at MAN 1 Parepare are in the sufficient category based on the average value obtained. The factors that cause the students' speaking English skills at MAN 1 Parepare to be in the sufficient category, namely the results of the average value of data collection from the students' speaking English skills questions that have been distributed by the researcher so that it has a sufficient category.
3. The Influence of Teacher Performance toward Students Speaking English Skills Based on the results of data analysis that has been carried out by researchers through statistical regression analysis calculations show that, the performance of MAN 1 Parepare teachers can be said to be sufficient correlation. This is supported by the computational result $\left(\mathrm{r}_{\mathrm{xy}}\right)$ which is higher than the table.

There was 12 student agreed that the level of teachers' performance in MAN 1 Parepare is strongly agree, 20 students agreed that their level of teachers' performance agree, 3 students agreed that their level of performance is neutral, 3 student agreed is disagree, 0 students agreed their level of performance is strongly disagree.

Meanwhile, the score of students' speaking English skills was excellent (0\%), very good $(76 \%)$, good $(16 \%)$, fair $(8 \%)$, poor $(0 \%)$, very poor $(0 \%)$ and failed $(0 \%)$ in speaking English test. This proves that the teacher's performance has a significant correlation with students' speaking skills, which can be seen from the scores obtained by students who are able to achieve good grades.

To discuss whether there was influence of the teachers' performance toward the students' speaking English skills of the second grade students of MAN 1 Parepare or not, it is necessary to present the research hypothesis. The research hypotheses of this research were:

1. Null Hypothesis: there is no any significant influence of the teachers' performance toward the students' speaking English skills at the second grade students of MAN 1 parepare.
2. Alternative Hypothesis: there is significant influence of the teachers' performance toward students' speaking English skills at the second grade students of MAN 1 parepare.

The analysis of the results of the research that has been carried out shows that there is an influence between teacher performance on speaking English skills in MAN 1 Parepare. This result is indicated by the coefficient value of 0.570 , which is greater than the $\mathrm{r}_{\text {table }}$ of 0.320 . In addition, the value of $\mathrm{F}_{\text {count }}=17.348$, while $\mathrm{F}_{\text {table }}=4.11$ with a significance value $=0.000<0.05$. As for the criteria Ho is rejected if $\mathrm{F}_{\text {count }}>\mathrm{F}_{\text {table }}$ with $=0.05(5 \%)$ with a value of $17.348>4.11$. In conclusion, Null hypothesis $\left(\mathrm{H}_{0}\right)$ was rejected and Alternative Hypothesis $\left(\mathrm{H}_{1}\right)$ was accepted. So there is significance influence of the teachers' performance toward the students' speaking English skills of the second grade students of Madrasah Aliyah Negeri 1 parepare.
