

CHAPTER V

CONCLUSION AND SUGGESTIONS

A. Conclusion

After conducting the research and doing data analysis, the researcher can draw conclusion in this two following points:

1. Based on the discussion in the previous chapter it can be proven by looking at the students' scores in inflectional skills, there are 3 students who are able to answer with a value of 5.21 while the score
2. Based on the discussion in the previous chapter, it can be proven by looking at the student's ability score in derivational that there are 34 students who are able to answer with a value of 4.96 while the low score is -1.36 while the average score of students' ability is 71 .

B. Suggestion

Based on the conclusion, the researcher would like to give some suggestions related to this researcher the English Lecturer, students and other researcher. The suggestions are as follows:

1. For the English Lecturer

English teachers must pay special attention to their students about the morphological bound morphem material for their students. Because the ability about morphological is still lacking

2. For the Students

Researchers suggest that students are more aware of the abilities they have. Students should do their best to practice and build their abilities.

3. For another Researcher

In this study, researchers collected data to meet directly with students. So researchers are not sure 100% of students answer questions seriously or honestly, even though researchers have told them to answer questions seriously or honestly. Therefore, researchers suggest other researchers who want to know about the strength of students' abilities to be more careful in collecting data
