## ENDORSEMENT OF CONSULTANT COMMISSIONS

The Title of Thesis : The Effect of Clustering Technique to Improve Students' English Writing At The Eighth Grade Students of SMPN 2 Patampuan, Kab. Pinrang

Name of the Student : Ratnawati

Student Reg. Number : 18.1300.067

Study Program : English Education

Faculty : Tarbiyah

By Virtue of Consultant Degree : SK The Dean of Tarbiyah Faculty No. B. 2924/In.39.5/PP.00.27/9/2021

Approved by  
Consultant Commissions

Consultant : Dr. Arqam, M.Pd.  
NIP : 19740329 200212 1 001

Co-consultant : Drs. Ismail Latif, M.M.  
NIP : 19631207 198703 1 003

*Merkel*  
(.....)

## ENDORSEMENT OF EXAMINER COMMISSIONS

The Title of Thesis : The Effect of Clustering Technique to Improve Students' English Writing At The Eighth Grade Students of SMPN 2 Patampuan, Kab. Pinrang

Name of the Student : Ratnawati

Student Reg. Number : 18.1300.067

Faculty : Tarbiyah

Study Program : English Education

By Virtue of Consultant Degree : SK The Dean of Tarbiyah Faculty  
No. B. 2924/In.39.5/PP.00.27/9/2021

Date of Graduation : February, 13<sup>th</sup> 2023

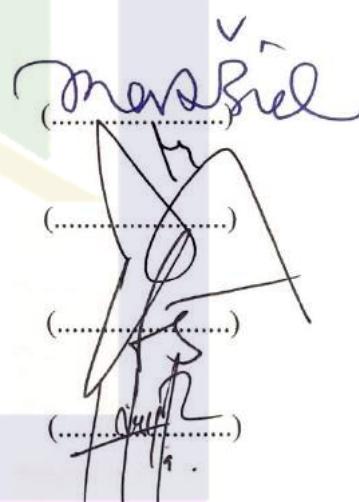

Approved by Examiner Commision

Dr. Arqam, M.Pd. (Chairman)

Drs. Ismail Latif, M.M. (Secretary)

Dr. Abdul Haris Sunubi, M.Pd. (Member)

## ACKNOWLEDGEMENT

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

لَحَمْدُ اللَّهِ رَبِّ الْعَالَمِينَ، وَ الصَّلَاةُ وَ السَّلَامُ عَلَى أَشْرَفِ الْأَنْبِيَاءِ وَ الْمُرْسَلِينَ سَلَّمَنَا مُحَمَّدٌ وَ عَلَى أَهْلِهِ وَ أَصْنَابِهِ أَجْمَعِينَ.

Alhamdulillahi Rabbil 'Alamin, Praise is merely to the Almighty Allah SWT. Give thanks for God's love and grace for us, the most gracious, the most merciful, the lord of the universe and the master of the judgment, the king of the kings, who has given his bless and salvation to the writer for finishing this Thesis entitled: The Effect of Clustering Technique to Improve Students' English Writing At The Eighth Grade Students of SMPN 2 Patampanua, Kab. Pinrang. Shalawat and salam always be given to our prophet Muhammad saw. (Peace is upon him) a person that becomes a leader, the best example for us, who has been guided us from uneducated person to be educated person or the other words from the bad character to the good one.

The thesis not merely the writer own work because of having greatly improved by some great people around the writer who suggested and giuded by giving comments and advise to make it better. The writer spen a lot of time writing this paper. She expects that it will usefull information and give new knowledgefor anyone who reads it. During the period of conducting the research and writing this paper, the writer got many valuable contribution from a number of people in order to complete it. Therefore, the writer would be like to express her sincare thanks and appreciation to:

1. The writer's beloved parents ( Arifai and Suriani) for their greet love, attention, trust and pray.

2. The writer's deeps appreciation is extended to writer's first consultant Dr. Arqam, M.Pd. and the second consultant Drs. Ismail Latif, M.M. for their guidance and encouragement during the research.
3. Dr. Hannani, M.Ag. as the Rector of IAIN Parepare who has worked hard to manage education of IAIN Parepare.
4. Dr. Zulfah, M.Pd as the Dean of Tarbiyah in IAIN Parepare, who has arranged a positive edutation for students in faculty of Tarbiyah.
5. Dr. Arqam, M.Pd as the Chairman of English Education Program in IAIN Parepare who has given him motivation, guidance and suggestion that veru helpful to complete the Thesis. Thank you for your good advice and valuable input.
6. All the lecturers of English Education and Tarbiyah Faculty, and all the staffs of IAIN Parepare thank you for your time, knowledge, advice and motivation that you have given to the writer since she is studying in this great campus.
7. SMPN 2 Patampanua, especially to Drs. Sultan, M.Pd. as the principal who allowed the writer to research at SMPN 2 Patampanua, thank you for the good welcome to the writer.

Finally, the researcher also would like to say big thanks to all her amazing friends, and awesome people that researcher cannot mention the names that have helped and supported her sincerely, the researcher hopes that this Thesis can be useful for us and become a reference the next research.

Parepare, December 10<sup>th</sup> 2022

Ratnawati

## DECLARATION OF THE AUTHENTICITY OF THE THESIS

The writer who signed the declaration below:

Name : Ratnawati  
Student Reg. Numer : 18.1300.067  
Place and Date of Birth : Pinrang, October 18<sup>th</sup> 2000  
Study Program : English Education  
Faculty : Tarbiyah Faculty  
Title of Thesis : The Effect of Clustering Teachnique to Improve Students' English Writing at the Eighth Grade Students of SMPN 2 Patampanua, Kab. Pinrang

Stated this thesis was her own writing and if it can be proved that it was copied, duplicated or complied by any other people, this thesis and the degree that has been gotten would be postponed.

Parepare, December 10<sup>th</sup> 2022

## ABSTRACT

Ratnawati. *The Effect of Clustering Technique to Improve Students' English Writing at The Eighth Grade Students of SMPN 2 Patampanua, Kab. Pinrang* (Supervised by Arqam and Ismail Latif ).

The research aims to solved the students' English writing was at SMPN 2 Patampanua, Kab. Pinrang. Many factors cause students to be unable to writing, one of which is the teachers inability to explain writing lessons effectively because they do not use learning strategies in teaching. As was the case, in the eighth grade students of SMPN 2 Patampanua, based on the observation before most of the students were unable to write properly. Based on this problem, the researcher want to conduct research using a learning strategy, namely clustering technique.

The researcher used quantitative method with quasi experimental in her research and the population in this research is 140 students with the sample of students is 57 students. To collecting data the researcher used test instrument. The researcher took time for research at the SMPN 2 Patampanua about 3 weeks.

The result of this research based on students' score after the treatment was done. It was indicated that there is a effect of clustering technique to improve students english writing at the eighth grade of SMPN 2 Patampanua, Kab. Pinrang.

Keywords: *writing, clustering technique.*

## **CHAPTER I**

### **INTRODUCTION**

This chapter discusses about background, problem identification, research problem, objective of the research, the significance of the research.

#### **A. Background**

In learning a language, we are required to master several skills including speaking, reading, listening and writing. Each skill has its own difficulties in mastering such as speaking we are required to know a lot of vocabulary and also how to pronounce it correctly, reading is the same as speaking we have to know how to pronounce it and understand the meaning in each sentence, listening we also have to be proficient in listening to words with listening in other words mastery of vocabulary, pronunciation and also understanding the meaning of every sentence that is heard, and the last is writing in writing we must understand and know several aspects such as vocabulary, grammar and also how we express ideas in writing.

In writing, we must know what aspects we must have when writing, including what obstacles students experience when writing. The obstacles faced by students in writing include lack of vocabulary, poor grammar, inability to arrange words into sentences, inability to spell every word correctly, choose the right words, write certain letters and give up quickly. This problem is experienced by many students at the secondary education level considering they do not have basic knowledge of English subjects.

Based on these problems, the previous researcher had made preliminary observations at the SMPN 2 Patampanua school and asked the school for permission to conduct research later. In this observation, the researcher took data about the problems experienced by students in learning English by means of direct interviews with English language teachers. After conducting interviews, researcher have encountered several problems at SMPN 2 Patampanua in learning English. There are three subject problems, namely from teachers, students and school. From the teachers, there are 3 teachers who teach English subjects at SMPN 2 Patampanua, of the three teachers, only 1 teacher used learning strategy and the other teachers used the lecture method in delivering the subject matter. From school, the school does not facilitate learning media in learning English. From students, they have a low level of learning motivation so that they are bored in learning writing and also students have limitations in mastering vocabulary because they do not have the basis of previous education<sup>1</sup>.

The lack of students' learning motivation and the lack of vocabulary that students have are the main reasons why students have difficulty in learning English, including writing learning. Based on the problems above, the researcher wants to do a treatment on students' writing skill by providing a learning strategy that can help students in writing problems, namely the clustering technique.

---

<sup>1</sup>Rosmini,Desa Sipatuo,Kec. Patampanua, Kab. Pinrang, *wawancara* di SMPN 2 Patampanua, 04 Juni 2022.

The clustering technique is also known as charting or mapping, according to Langan. For visual methods, this method is especially useful. The relationship between ideas and details is represented by lines, squares, arrows, and circle in the clustering. In addition, Pharr and Santi, the groups' students,, write topic in the middle of a piece of paper and then write ideas from surrounding topics, connecting them to the topic with a line, subtopics follow the same procedure. As the this method assists students in coming up with their concepts before turning them into letters. According to Royan, the Clustering techniques assists students generate ideas<sup>2</sup>. The clustering technique can be used as a writing learning strategy, as the opinions of the experts above suggest.

There are many studies that use clustering techniques in their research, many researchers only focus on increasing students' vocabulary because vocabulary is the basic and main thing that must be mastered in mastering a foreign language. Thus, the research that will be carried out by researcher using clustering techniques focuse on students' writing skill, especially in writing descriptive texts.

The researcher chose descriptive text because descriptive text is included in the material in learning English taught at SMPN 2 Patampanua, hereby the researcher wants to conduct a research entitled 'The Effect of Clustering Technique to Improve Student's English Writing at Eighth Grade of SMPN 2 Patampanua, Kab.Pinrang'.

---

<sup>2</sup>Tenia Ramalia and Nirna Nirmala. " Using Clustering Technique in Teaching Writing", *Jurnal Ilmu Pendidikan dan Ilmu Sosial* 28, no. 1 (2019):20

## B. Problem Identification

Based on the background above, the researchers set several identification problems as follows. (1) eighth grade students of SMPN 2 Patampanua have low learning motivation, (2) eighth grade students of SMPN 2 Patampanua are lacking in vocabulary mastery, (3) lack of supporting facilities in learning that the school has, (4) teachers of SMPN 2 Patampanua are mostly do not use learning strategies and only use the conventional method.

## C. Research Question

Based on the background above, the writer formulates the question of problem as follow:

1. How is the student's English writing at the eifghth grade student of SMPN 2 Patampanua, Kab. Pinrang?
2. Is clustering technique able to improve student's English writing at the eighth grade student of SMPN 2 Patampanua, Kab. Pinrang?

## D. The Objective of The Research

Based on the problem question above, the objective of this research as follow:

1. To know how student's English writing at the eighth student grade of SMPN 2 Patampanua, Kab. Pinrang.
2. To find out whether or not clustering technique improve student's English writing at the eighth grade student of SMPN 2 Patampanua, Kab. Pinrang.

## E. Significance of Research

The research that will be carried out will provide benefits including the following:

### 1. Theoretical Benefits

This research is expected to provide a broad understanding and study of the effect of clustering techniques on students' descriptive text writing skills and also increase knowledge about this research and can be used as a comparison in future studies.

### 2. Practical Benefits

#### a. For Researchers

This research can be used by researcher as an in-depth experience of the teaching and learning process, especially in English subjects, in applying it to all lecture theories that have been used during lectures and adding insight into learning writing.

#### b. For Teachers

This research can help teachers as an alternative in the problems of the teaching and learning process, especially in English subjects in students' writing skills while increasing their insight to carry out learning strategies in the teaching and learning process so that the atmosphere in the classroom can have a positive impact on students.

c. For School

This research can assist schools in finding out what problems are experienced by teachers and students and also provide an understanding for schools to play an active role in facilitating teaching and learning activities.

## CHAPTER II

### REVIEW OF LITERATURE

In order to achieve the study's goal, every research should include a review of relevant literature. The literature review for the forthcoming research is the subject of this chapter. It starts from previous research findings, definition of writing, benefits of writing, definition of descriptive text, descriptive text structure, steps to write descriptive text, understanding of clustering technique, types of clustering technique, using clustering technique in teaching writing descriptive text, the benefits of clustering technique, conceptual framework, and hypothesis.

#### A. Previous Research Finding

In this study, the researcher includes previous research, based on the concept and title which is almost the same in this study, while some previous studies are as follows:

The first research conducted by Iskandar, et al in 2021, which was located in the Binamu sub-district, Jeneponto Regency, with the title "*Keefektifan Penggunaan Metode Clustering dan Show Not Tell terhadap kemampuan menulis teks deskripsi Peserta Didik SMP Kelas VII Kecamatan Binamu Kabupaten Jeneponto*", the problem of the research This is that there are several schools that have difficulty writing descriptive texts in junior high school education in Binamu District, Jeneponto Regency, mainly on the part of students who are unable to express ideas that will be written, the research method used in this study is a one group pretest research design. - posttest design, with a population of 9 schools in Binamu District and the sample used is 75 samples from 3 schools, The data analysis used was descriptive quantitative and inferential statistics, the results found that there were

significant differences in student learning outcomes after Clustering and Show Tell were applied to the three schools in other words the use of these methods was effective in improving students' writing descriptive text skills<sup>3</sup>.

The second research conducted by Andi Paidia in 2021 with the research title '*Peningkatan Kemampuan Menulis Paragraf Narasi Kelas X3 SMA Negeri 3 Sinjai Melalui Pengingtegrasian Teknik Clustering dan Jurnalistis Questsions*', the problems of this research are the most of the X3 class students of SMA Negeri 3 Sinjai have poor writing skill such as lack of using correct grammar and low learning outcomess for Indonesia subject. In this research, using classroom action research method and data analysis technique used in the form of qualitative dan quantitative analysis. From the results of his research found that the ability to write narrative paragraphs of class X3 students of SMA Negeri 3 Sinjai has increased significantly.<sup>4</sup>

The third research conducted by Rita in 2018, with the title of her research, "*Pengaruh Model Pembelajaran Kooperatif Tipe Kalimat Konsep Terhadap Kemampuan Menulis Karangan Deskrpsi Siswa Kelas X Sma Swasta Nurul Amaliyah*", the problem in this research is the lack of teacher ability in making the teaching and learning process effective, especially on the subject of student description essays, the research method carried out in this study was experimental research with a two group only post test design research design, the number of samples was 72 people from 72 populations,

---

<sup>3</sup>Iskandar, et al. "Keefektifan Penggunaan Metode Clustering Dan Show Not Tell Terhadap Kemampuan Menulis Teks Deskripsi Peserta Didik SMP Kelas VII Di Kecamatan Binamu Kabupaten Jeneponto," *Jurnal Onoma: Pendidikan, Bahasa, Dan Sastra* 7, no. 2 (2021): 424–36, <https://doi.org/10.30605/onoma.v7i2.1266>.

<sup>4</sup>Andi Paidia., "Peningkatan Kemampuan Menulis Paragraf Narasi Kelas X3 Sma Negeri 3 Sinjai Melalui Pengingtegrasian Teknik Clustering Dan Journalis Questions" 10, no. 3 (2017): 17–18.

the data analysis used was the t- test with the results of the study increasing significantly. significantly to the ability to write descriptive essays of class X students of SMA Private Nurul Amaliyah<sup>5</sup>.

Based on several previous researches that the researcher uses as a reference, there are elements of significant differences. The discussion in the research that the researcher will discuss here as a common thread with previous research includes:

1. There are differences in research methods
2. The number of populations and samples used are different.
3. The research location is different.
4. There are differences in data analysis techniques
5. There is a different frame of mind
6. The researcher focus on implementation of the Clustering Technique to improving student's writing ability at eighth grade of SMPN 2 Patampanua.

It is possible to draw the conclusion from a review of the above-mentioned results of previous studies that this research is significantly different from previous research. As the result, it can be serve a reference for future researchers and be useful for further researcher.

## B. Some Pertinent Ideas

### 1. Basic Concept of Writing

#### a. Definition of Writing

According to Tarigan, writing is deriving or describing symbols which produces a language that graphically can be understood by someone so that other people can read the graphic symbols and can understand that language and graphics. According to Suparno and Yusnus, writing activity involves several elements, namely the writer as message giver, writing content, channel or media, and reader. Writing is an activity that triggers a message (communication) with using written language as a tool or medium<sup>6</sup>.

From some of the opinions above, it can be understood that writing is a form of the way in which a person describes what is in his mind and then poured it in the form of text or written discourse in a written medium. in his mind in written form.

#### b. Benefits of Writing

Percy suggests there are six benefits in writing as follows<sup>7</sup>:

##### 1) A means of self-disclosure.

Writing a poem or writing a series of sentences is one way to express your feelings. Everyone always needs self-disclosure in a different way.

##### 2) A means of understanding.

---

<sup>6</sup> Nirwan and Abd. Rahim Ruspa, "Kemampuan Menulis Karya Tulis Ilmiah Mahasiswa Prodi Informatika Universitas Cokroaminoto Palopo", *Jurnal Onoma: Pendidikan, Bahasa dan Sastra* 6.no.1 (2020):558.

<sup>7</sup>Supriyadi, *Keterampilan Dasar Menulis* (Gorontalo: Ideas Publisher, 2018).p 8-9.

By writing, a person reflects their ideas and refines their understanding of something so that in the end, he may gain new or more understanding of what he is writing.

- 3) A means to help develop personal satisfaction, pride, and a feeling of self-worth.

Pride, satisfaction, and self-esteem are awards for success in creating a work. Ultimately, this feeling stimulates confidence in one's ability to continue creating other written works.

- 4) A means of increasing awareness and application to the surroundings.

By writing regularly, one improves the senses and develops the ability to absorb the physical level, emotional level and spiritual level.

- 5) Means of passionate engagement rather than forced acceptance.

Someone is writing presenting ideas, creating something, and being actively involved with content creation.

- 6) A means to develop an understanding and ability to use language.

Perhaps the most common goals of school education are the ability to read and understand what other people write, and the ability to use written language to convey information to others. It is clear that writing activities can help achieve this goal

## 2. Descriptive text

### a. Definition of descriptive text

According to Yadi Mulyadi, et al's book, a description is a kind of essay that is written in real condition so that the reader can imagine (see, hear, smell and feel) what is written based on the author's image<sup>8</sup>. Kosasih, on the other hand, define a descriptive as an essay that gives the impression that the reader has been the object being described<sup>9</sup>.

According to Pardiyono, descriptive text is text or reading that contains information in a visible form from something visible, both qualitatively and quantitatively<sup>10</sup>. From several opinions about descriptive text, it can be understood that descriptive text is a text that contains an object that can be verified, in other words, it can describe the object being observed.

### b. Descriptive Text Structure

There are 3 parts of the descriptive text as follows:

#### 1) Identification

Identification is the first step when you want to write something based on what object you want to write.

#### 2) Descriptive

This section contains information about what is written and explained in detail about the characteristics. There are various types of descriptive text development, namely based on space, object part members, ongoing process, and focus of writing.

<sup>8</sup>Nurbaya Sari.“Materi Teks Deskriptif Orang Melalui Model Discovery Learning Pada Siswa Kelas VII-a SMPN 3 Masbagik,” *Pensa: Jurnal Pendidikan Dan Ilmu Sosial* 2 (2020): 328.

<sup>9</sup>Dian Permanasari, “Kemampuan Menulis Teks Deskripsi Siswa Kelas VII SMP Negeri 1 Sumber Jaya Lampung Barat,” *Jurnal Pesona* 3, no. 2 (2017): 158.

<sup>10</sup>Febtriningsih.“Meningkatkan Kemampuan Listening Skill Melalui Metode Dikte Pada Teks Deskriptif Smp Negeri 22 Surakarta,” *Jurnal Penelitian Kebijakan Pendidikan* 11, no. 3 (2019): 150.

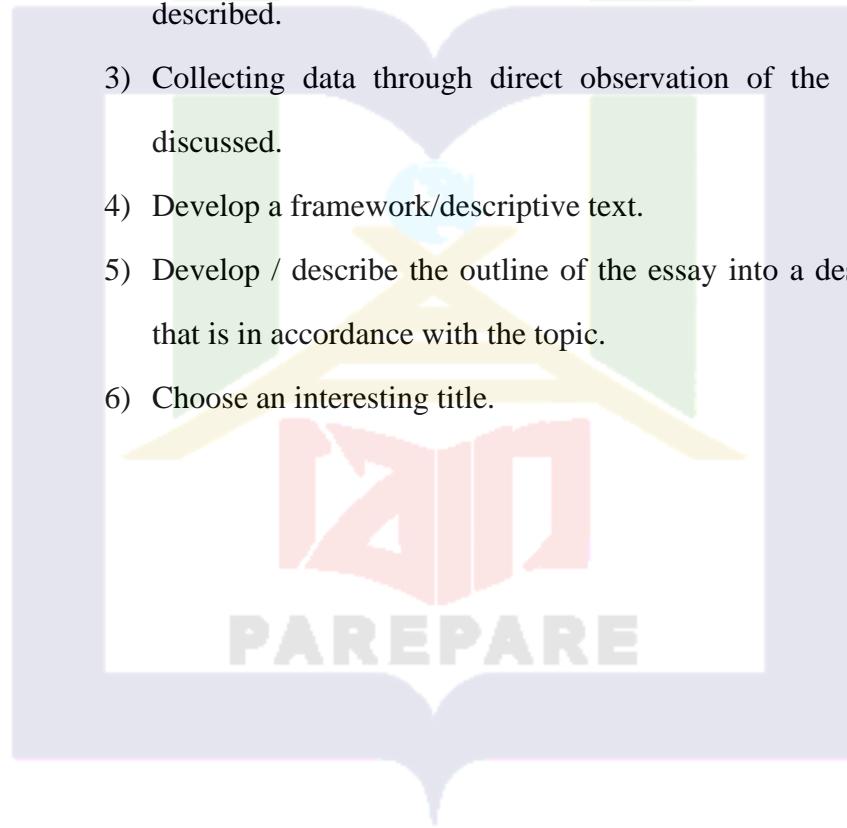

### 3) Conclusion

At this last stage, it contains the impression that the author feels on the object being written.

#### c. Steps to write descriptive text

The steps for writing descriptive text are as follows<sup>11</sup>.

- 1) Determine the theme or topic that will be the object.
- 2) Determine the purpose and understanding of the object to be described.
- 3) Collecting data through direct observation of the object to be discussed.
- 4) Develop a framework/descriptive text.
- 5) Develop / describe the outline of the essay into a descriptive text that is in accordance with the topic.
- 6) Choose an interesting title.

### **3. Clustering technique**

#### a. Understanding Clustering Techniques

Oshima and Hogue said that the clustering technique is an activity to find ideas or ideas to develop the idea itself.<sup>12</sup> According to Rico in DePorter & Hernacki, groups are way of organizing thoughts interdependence and to get it on paper quickly without considering the truth and benefits<sup>13</sup>.

Frans declare that the cluster is a technique performed by shaping data analysis, organize our team of experts into specific target group<sup>14</sup>. According to Caryn Meriam, Clustering is a technique that helps develop texts in different ways by taking ideas and branching off in different directions.<sup>15</sup>

#### b. Types of Clustering techniques

There are five models of clustering as described by Buzan<sup>16</sup>:

##### 1) Spider Diagram

Spider diagrams are used to investigate and sum up aspects of a theme or topic to help students organize topics. This diagram helps students focus on the topic.

<sup>12</sup>Endah Anisa Rahma, "Pembelajaran Menulis Dengan Menggunakan Teknik Clustering," *At-Ta'Dib: Jurnal Ilmiah Prodi Pendidikan Agama Islam* 10, no. 1 (2018):p13.https://ejournal.staindirundeng.ac.id/index.php/tadib/article/view/111.

<sup>16</sup>Hidayatur Rohmah and Emi Lilawati."collaboration of Clustering Technique and Picture in Teaching Vocabulary". *Eduvelop Jurnal of English Education and Development* 3. no. 1 (2019):22.

## 2) Tree Diagram

Used to link items between one another. Tree trunks represent topics and branches represent factors, traits, influences and others.

## 3) Venn Diagram

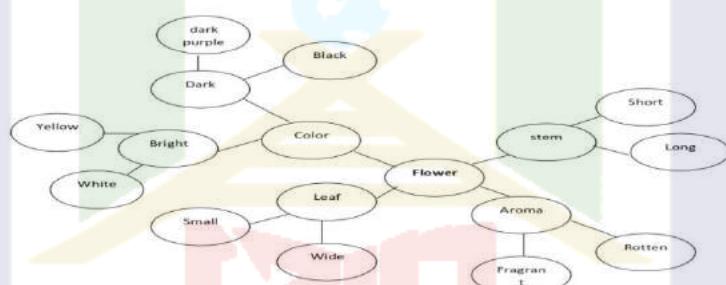

This diagram is used to test the similarities and differences of an item.

## 4) Thematic Diagram

This diagram is used to map the hierarchical relationship of a thing.

## 5) Story Map Diagram

These diagrams are used to help students determine the elements, themes, or morals of a story.

2.1 Figure of Clustering Technique

### c. Using Clustering Technique in Teaching Writing Descriptive Text

The operation of this clustering fashion can be started from determining the topic to be bandied, also apply boxes, lines, or circles to the ideas that came up. The ideas that arise can be written in the form of words or emulsion words<sup>17</sup>. The way in the clustering fashion begin with writing down the words, also crossing out the words or ideas which do not want to be explored in further depth, and the final step of the words or ideas associated so that a complete ideas is formed as jotting material<sup>18</sup>.

There are many teaching stetegy that can help teachers in teaching and learning process. With the teaching strategy the teachers are more easy in teaching and the students understandly early. Based on that, the researcher choose the clustering technique in teaching writing.

Clustering technique consists of five types, namely spider diagram, tree diagram, venn diagram, thematic diagram and story map diagram. In this research the researcher used a spider diagram. The researcher chose spider diagram because this type of clustering technique is easy to apply and understand to focuse on a topic then students not confuse to how to used this strategy.

<sup>17</sup>Delfia Herwanis and Susidamaiyanti."Peningkatan Kemampuan Menulis Teks Deskriptif Berbahasa Inggris Melalui Teknik Clustering Pada Program Study Tadris Bahasa Inggris di STAIN Gajah Putih Tekengon". *Jurnal As-Salam* 4. no. 2 (2020):219..

<sup>18</sup>Rismaneti. "Peningkatan Kempanuan Menulis Puisi Melalui Teknik Clustering Dengan Media Foto Jurnalistik Pada Siswa Kelas VIII. 6 di SMP Negeri 13 Pekanbaru". *Instructional Developments Journal (IJD)* 1. No. 2 (2018):115.

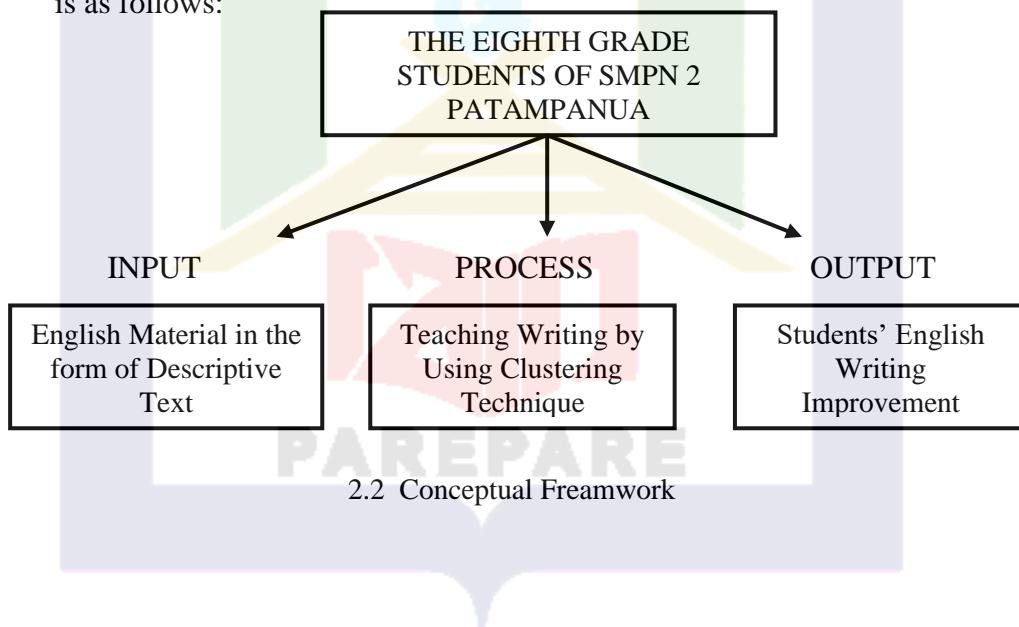

The researcher must first creat a clustering technique diagram before applying the strategy. The researcher then displayed a picture of animals. The researcher asks the students aswer the question about; “ What is this animal? What kind of animal is this? What is the color of this animal? And what is the animal eats?” and so forth. The clustering technique diagram must be followed throughout the responses. The researcher then selected the appopriate animal characteristics and eliminated the other.

The researcher then instructs the students to construct the aforementioned clustering diagram in a single sentence and arrange it into an appropiate descriptive text. The researcher must move from general to specific information when writing a descriptive text. The researcher draft a paragraph for use as an example of descriptive text on the whiteboard.

- d. The benefits of clustering technique
  - 1) It can make students produce new ideas that are used as original material to be developed in essays that will be worked on coming.
  - 2) It can give students with optimizing the performance of their smarts in determining, expressing and developing ideas in the form of essays.
  - 3) It can increase attention to main idea that's most important when in the process of composing an essay.
  - 4) It creates a new atmosphere for students, videlicet an effective, delightful and varied atmosphere so that it can increase students' interest in literacy and creativity in learning essays.

### C. conceptual framework

Agung Widhi Kurniawan and Zahra Puspitaningtypas said that the conceptual framework is a way of thinking based on the logical flow of thinking for solving research problems, containing the rarities or problem-solving frameworks that must be carried out in research<sup>19</sup>. In this research, there are three components will explain in the following, the first component is *input* explain it to apply descriptive text material. The second component is a *process* it refer to the teaching writing through clustering technique. The last component is *output* it refer to the effect of the clustering technique to teaching writing descriptive text. The conceptual framework in this research is as follows:

<sup>19</sup>Agung Widhi Kurniawan dan Zahra Puspitaningtypas, *Metode Penelitian Kuantitatif* (Yogyakarta: Pindiva Buku, 2016). p 47.

## D. Hypothesis

The hypothesis is a scientific statement that is based on a research conceptual essay with deductive reasoning and is a theoretical temporary answer to the problems encountered, and can be tested for truth based on empirical facts. In this study there are two hypotheses with the aim of seeing whether there is a significant effect or not and to see whether there is an effect or not it can be proven by testing the hypothesis, for the hypothesis that is affected is called the Active hypothesis ( $H_a$ ) and for the hypothesis that is not affected. called the Null hypothesis ( $H_0$ ) hereby which will be the hypothesis of this research, there are two, namely:

Null Hypothesis ( $H_0$ ):

There is no effect of Clustering Techniques to improve students' English writing at the eighth grade students of SMPN 2 Patampaua, Kab. Pinrang.

Active Hypothesis ( $H_a$ ):

There is a significant effect of Clustering Techniques to improve students' English writing at the eighth grade students of SMPN 2 Patampaua, Kab. Pinrang.

## CHAPTER III

### RESEARCH METHODOLOGY

This study's research method is explained in this chapter. It includes the research design, research location and time, population and sample, procedure of collecting data, treatment, research instrument, variable operation definition, technique to analysis data.

#### A. Research Design

This research used quantitative research with an experimental approach. The type of experimental research model that used is quasi-experimental using Nonequivalent Control Group Design. In this design there are two groups or two classes that are the object of research. The following is a diagram explaining this experiment:

Table. 3.1  
Diagram of Quasi Experimental

Group	Pre-test	Treatment	Posttest
Experimental	O <sub>1</sub>	X	O <sub>2</sub>
Control	O <sub>1</sub>	-	O <sub>2</sub>

Information:

O<sub>1</sub> : Pre-test

O<sub>2</sub> : Post test

X : Treatment

## B. Research Location and Time

Researchers conducted research at SMPN 2 Patampanua located in Urung, Sipatuo Village, Patampanua District, Pinrang Regency. The implementation time is three weeks.

## C. Population and Sample

The sample is a part of the population, a population is a general field that includes subjects who have been chosen by the researcher to be studied and then to draw conclusions from. In this research, the population is the eighth grade SMPN 2 Patampanua, Pinrang district with a total of 140 students, while the number of sample selected is 57 at the eighth students at SMPN 2 Patampanua, Pinrang district using the Cluster Random Sampling technique.

## D. Procedure of Collecting Data

### 1. Pre Test

In the first meeting, the researcher gave the students a pre-test as an activity prior to administering the treatment. Before treatment, it is important to know the students' English writing. The researcher treated students in the experimental class, but they will not treat students in control class.

## 2. Posttest

After giving the treatment, the researcher gave students posttest to find out the result of the treatment to measure students' English writing ability through clustering technique.

## E. Treatment

The researcher performed treatment on the experimental class and control class for six meetings, the researcher taught writing descriptive text using the clustering technique in the experimental class and the conventional method in control class.

### 1. The First Meeting

In the first meeting, the researcher opened the class and greet them, and giving students' motivation in learning English. Next, the researcher explained the material about descriptive text. After explain, the researcher gave students' pre test.

### 2. The Second Meeting

In the second meeting, the researcher opened the class and greet them, and giving students motivation in learning English. Next, the researcher explained the material and then ask the students to devide into 3 groups. The researcher used clustering technique this meeting. After that, the researcher explain about the way to use clustering technique. Next, the researcher wrote some vocabulary about animals, and students used clustering technique, and wrote in the whiteboard. After that, the researcher gave each groups some assignments. After that the researcher make conclusion with the students. The researcher closed the class.

### 3. The Third Meeting

In the third meeting, the researcher opened the class and greet them, and giving students motivation in learning English. Next, the researcher explained the material and then ask the students to devide into 3 groups. The researcher used clustering technique this meeting. After that, the researcher explain about the way to use clustering technique. Next, the researcher wrote some vocabulary about animals, and students used clustering technique, and wrote in the whiteboard. After that, the researcher gave each groups some assignments. After that the researcher make conclution with the students. The researcher closed the class.

### 4. The Fourth Meeting

In the fourth meeting, the researcher opened the class and greet them, and giving students motivation in learning English. Next, the researcher explained the material and then ask the students to devide into 3 groups. The researcher used clustering technique this meeting. After that, the researcher explained about the way to use clustering technique. Next, the researcher wrote some vocabulary about animals, and students used clustering technique, and wrote in the whiteboard. After that, the researcher gave each groups some assignments. After that the researcher make conclution with the student's. The researcher closed the class.

## 5. The Fifth Meeting

In the fifth meeting, the researcher opened the class and greet them, and giving students motivation in learning English. Next, the researcher explained the material and than ask the students to devide into 3 groups. The researcher used clustering technique this meeting. After that, the researcher explain about the way to use clustering technique. Next, the researcher will wrote some vocabulary about animals, and students used clustering technique, and wrote in the whiteboard. After that, the researcher gave each groups some assignments. After that the researcher make conclution with the students. The researcher closed the class.

## 6. The Sixth Meeting

In the sixth meeting, the researcher opened the class and greet them, and giving students motivasion in learning English. Next, the researcher asked the students with some question about descriptive text and then make conclution with them. After that, the researcher gave students posttest.

## F. Research Instrument

### a. Observation Method

The observation method is a data collection technique that is intended to make observations of various phenomena of conditions that occur. The observation method is used to determine the state and condition of SMPN 2 Patampanua, both in the form of facilities and infrastructure, the teaching and learning proses, the condition of teacher and students are closely related to this research.

### b. Test Method

The test method is a data collection technique by giving several questions to respondents to measure knowledge and skills. The method of data collection is in the form of tests in the form of pre-test and post-test.

## G. Variable Operational Definition

An operational definition is a definition based totally on the observable characteristics of what is described, or translating a conceptual variable into a dimension instrument. The following is the operational definition of the variables in this study as follows:

Clustering technique is a technique of grouping words to develop ideas from general to detailed so that this technique help novice writers to develop their ideas with a predetermined topic.

Writing is one way of expressing what is experienced by someone through written media and then arranged based on grammatical rules and writing structures of a written text.

## H. Technique of Data Analysis

Data analysis is defined as an effort to manage data into information, so that the characteristics or attributes of the data can be easily understood and used to answer the problem formulation. The data analysis that will be carried out by this research is the Analysis of Independent Samples T-test to determine whether there is a significant difference between the pre-test and posttest values using the SPSS application with the follow: Data analysis was carried out using the following formula:

1. Right student's answer :

$$\text{score} = \frac{\text{The number of students' correct answers}}{\text{Number of questions}} \times 100$$

2. Classification of student scores with the following criteria:

Table. 3.2  
Clarification of Students' score

No	Score	Classification
1	86 – 100	Excellent
2	66 – 79	Good
3	56 – 65	Enough
4	40 – 55	Poor
5	< 39	Very Poor

3. Determine the average score in the pre-test and post-test

$$\bar{x} = \frac{\sum x}{N}$$

Note:

$\bar{x}$  = Average

$\sum x$  = Total score

N = Total of students in class

After looking for the average value of the students, the researcher then looked for the standard deviation.

4. Determine the standard deviation

Determine the standard deviation using the following formula.

$$SD = \sqrt{\frac{\sum x^2 - \frac{(\sum x)^2}{N}}{N - 1}}$$

Note:

X = Observation value

N = Number of observations

SD = Standard deviation

Meanwhile, to analyze the differences in pre-test and post-test learning outcomes, an analysis was carried out using Independent sample t test, with the following formula:

$$t_{\text{hitung}} = \frac{X_1 - X_2}{\sqrt{\frac{(n_1-1)s_{12} + (n_2-1)s_{12}}{n_1+n_2-2} \left( \frac{1}{n_1} + \frac{1}{n_2} \right)}}$$

## CHAPTER IV

### RESEARCHER FINDING AND DISCUSSION

This chapter presents: (A) research findings: (B) discussions

#### **A. Research Finding**

In this section, the researcher analyzes the data. The researcher conducts descriptive and statistical analyses, which are the two types of analyses. In-depth descriptions of the data analysis as follow:

##### **1. Descriptive Analysis**

This research became carried out in SMPN 2 Patampanua on October 2022. The researcher took two classes that include experimental and control classes. The researcher took VIII. 3 which has 28 students as the control class and VIII.5 has 29 students as the experimental class. Therefore, the entire of the sample is 57.

To accumulate the data, the researcher used multiple choice in pre-test and essay in posttest. The material taught is descriptive text. Inside the first meeting, the researcher gave the students pre-test and last meeting the researcher gave posttest. To know the level of students' achievement after the usage of clustering technique in experimental class and without using clustering technique in control class, the scores are interpreted consistent with the table on the following.

Table. 4.1  
Classification of Students' Score

Value	Grade	Level of Achievement
80 – 100	A	Excellent
66 – 79	B	Good
56 – 65	C	Enough
40 – 55	D	Poor
< 39	E	Very Poor

The researcher used the data from the students' result of the test from the each experimental class and control class. The pre-test become accomplished earlier than the researcher give the treatment. the researcher doing pre-test to understand the students writing skill and knowledge without the usage of clustering technique then the researcher asks the students to answer the questions. Meanwhile, the posttest become accomplished after the researcher doing the treatment throught the use of clustering technique to improve students' writing skill.

The researcher gave the pre-test in students stared on 31 November 2022. The researcher gave the pre-test before giving the treatment for experimental class. The questions of pre-test and posttest experimental are similar to the control class. To explain variabel of this research by way of using clustering technique in teaching English writing used descriptive analysis. The static used are consist of the mean, range, high score, low score, standard deviation and variance also used to analyze the data. The stairs in doing descriptive research are as fallow:

### a. The writing Result of Experimental Class

The researcher carried out the pre-test in experimental class on 2 November 2022 and posttest on 19 November 2022. The pre-test was given earlier than treatment and the posttest was done after given the treatment for experimental class. The question of experimental class and control class are identical. Below is the table data descriptive statistic of students' score in pre-test and posttest are experimental class as follow:

Table. 4.2  
Score of Analysis Descriptive Experimental Class

Experimental class	Pre-test	Posttest
N	29	29
Mean	37,24	76,9
Range	60	72
high Score	75	100
Low Score	15	28
Standard Deviation	12,648	18,001
Variance	159,975	324,025

The table indicates in pre-test, the researcher can finish that the number of data is 29, the mean is 37,24, the range is 60, the high score is 75, the low score is 15, the standard deviation is 12,648, and the variance is 159,975. In the meanwhile, posttest number of data is 29, the mean is 76,9, the range is 72, the high score is 100, the low score is 28, the standard deviation is 18,001, the variance is 324,025. The researcher calculated the result end result by way of SPSS ver.25 application.

Table. 4.3  
Percentage of Pre-test and Posttest of Experimental Class

Interval	Interpretation	Pre-test		Posttest	
		F	Percentage	F	Percentage
80 – 100	Excellent	0	0%	15	51,72%
66 – 79	Good	1	3,45%	7	24,14%
56 – 65	Enough	1	3,45%	5	17,24%
40 – 55	Poor	9	31,03%	1	3,45%
<39	Very Poor	18	62,07%	1	3,45%
$\Sigma$		29	100%	29	100%

Based at the table above, the researcher concluded in pre-test of experimental class there has been 18 students (62,07%) belonged to very poor categories, 9 students (31,03%) belonged to poor categories, 1 student (3,45%) belonged to enough category, 1 student (3,45%) belonged to good category, and was no student (0%) belonged to excellent category. In posttest there has been 1 student (3,45%) belonged to very poor category, 1 student (3,45%) belonged to poor category, 5 students (17,24%) belonged to poor categories, 7 students (24,14%) belonged to good categories, and was 15 students (51,72%) belonged to excellent categories.

#### b. The Writing Result of Control Class

The researcher carried out the pre-test in control class on 31 October 2022 and posttest on 16 November 2022. The question of the pre-test and posttest are identical for the experimental and control classes. Below is the table data descriptive statistic of student's score in pre-test and posttest are

control class as follow:

Table. 4.4  
Score of Analysis Descriptive Control Class

Control class	Pre-test	Posttest
N	28	28
Mean	50,54	66,73
Range	65	72
high Score	75	100
Low Score	10	28
Standard Deviation	18,426	20,700
Variance	339,517	428,478

The table indicates in pre-test, the researcher can finish that the number of data is 28, the mean is 50,54, the range is 65, the high score is 75, the low score is 10, the standard deviation is 18,426, and the variance is 339,517. In the meanwhile, posttest number of data is 28, the mean is 66,73, the range is 72, the high score is 100, the low score is 28, the standard deviation is 20,700, the variance is 428,478. The researcher calculated end result by way of SPSS ver.25 application.

Table. 4.5  
Percentage of Pre-test and Posttest Score of Control Class

Interval	Interpretetion	Pre-test		Posttest	
		F	Percentage	F	Percentage
80 – 100	Excellent	0	0%	9	32,15%
66 – 79	Good	5	17,86%	3	10,71%
56 – 65	Enough	8	28,57%	6	21,43%
40 – 55	Poor	8	28,57%	7	25%
<39	Very Poor	7	25%	3	10,71%
$\Sigma$		28	100%	28	100%

Based totally on the table above, the researcher concluded in pre-test of experimental class there has been 7 students (25%) belonged to very poor categories, 8 students (28,57%) belonged to poor categories, 8 students (28,57%) belonged to enough categories, 5 students (17,86%) belonged to good categories, and was no student (0%) belonged to excellent category. In posttest that there has been 3 students (10,71%) belonged to very poor categories, 7 students (25%) belonged to poor categories, 6 students (21,43%) belonged to enough, 3 students (10,71%) belonged to good, and was 9 students (32,15%) belonged to excellent categories.

## 2. Statistical Analysis

- a. Test Data Analysis Requirements
  - 1) Normality Test

The normality test is a technique used to decide whether data came from a normally dispensed population or distribution normal<sup>20</sup>. The normality test performed on two data posttest score of experimental class and posttest control class. To test the normality of data uses the components Kamogorov-Smirnov at the significance is normal. The end result of normality test by using the usage of SPSS ver. 25 as follow:

---

<sup>20</sup> Nuryadi, et al, Dasar- dasar Statistik Penelitian,(Yogyakarta: Sibuku Media,2017).p 79.

Table. 4.6

Normality Test

<b>Tests of Normality</b>							
Kelompok Kelas		Kolmogorov-Smirnov <sup>a</sup>			Shapiro-Wilk		
		Statistic	df	Sig.	Statistic	df	Sig.
Nilai Posttest	kelas eksperimen	0,150	29	0,094	0,923	29	0,037
	kelas kontrol	0,135	28	.200*	0,953	28	0,231

\*. This is a lower bound of the true significance.

a. Lilliefors Significance Correction

Based on the table above shows that the result is. The researcher uses Kolmogorov Smirnov at the significace of 5% with 57 samples was 0,094 in experimental and 0,200 in conrol class. To testing the normality uses Sig.or significant or probablity value  $< 0,05$  then distribution is not normal. Meanwhile, Significant or probablity value  $> 0,05$  then distribution is normal. Based on the assumtion, it can be concluded the experimental class is 0,094 and the control class is 0,200 that conclude both of the two classes is distribution normal.

## 2) Test of Homogeneity

Homogeneity test is statiztical tests aimed for suggests that two or more sets of data samples came from populations with the same variance<sup>21</sup>. To assumed the result of gomogenity test the researcher uses Levene test that if significant value  $> 0,05$  then it can be said that the variation of the data is homogeneous. Conversely if the value  $< 0,05$  it can be said that the data

<sup>21</sup> Nuryadi, et al, Dasar- dasar Statistik Penelitian,(Yogyakarta: Sibuku Media,2017).p 89.

variation is not homogenous. The homogeneity test result of experimental class and control class by using SPSS ver.25 as follow:

Table. 4.7

Homogeneity Test					
Test of Homogeneity of Variance					
		Levene Statistic	df1	df2	Sig.
Nilai Posttest	Based on Mean	0,349	1	55	0,557
	Based on Median	0,137	1	55	0,713
	Based on Median and with adjusted df	0,137	1	53,907	0,713
	Based on trimmed mean	0,376	1	55	0,542

Based on the result the significant can conclude that the value is  $0,0557 > 0,05$  so the posttest homogeneity test of experimental class and control class are homogenous.

#### b. Test of Hypothesis

Hypothesis testing is done in the research by using Independent Sample t Test with pre-test and posttest data from experimental and control classes. To see how the increased the student's writing ability by using SPSS ver. 25 to analysis the data as the following.

##### Statistical Hypothesis

$H_0$  = there are no difference in mean between classes

$H_a$  =there are difference in mean between classes

$H_0 = \alpha > 0,05$ ; there are no difference in mean between classes was received.

$H_0 = \alpha < 0,05$  ; there are no difference in mean between classes was rejected.

Table. 4.8

Independent Sample T-test

Independent Samples Test										
		Levene's Test for Equality of Variances		t-test for Equality of Means						
		F	Sig.	t	df	Sig. (2-tailed)	Mean Difference	Std. Error Difference	95% Confidence Interval of the Difference	
Nilai Posttest	Equal variances assumed	0,349	0,557	2,316	55	0,024	11,789	5,091	1,588	21,991
	Equal variances not assumed			2,311	53,633	0,025	11,789	5,102	1,559	22,020

Based on the table above, the researcher used equal variances assumed because the data is homogenous. To know the result of the independent sample t test the researcher sees in (sig.2-tailed) and  $t_{table}$ , and the sig. 2 tailed is 0,024, so the result of posttest of experimental and control classes are 0,024  $< 0,05$  that the conclusion is,  $H_0$  is rejected and  $H_a$  received which means there are significance difference posttest of experimental and control classes. Then to sees the table distribution is value is  $5\%/2 = 2,5\%$  or 0,025, and the result of the analysis the (d.f) is 55 with the  $t_{0,025}$  is 2,004, to assumed it uses if  $t_{hitung} > t_{table}$ ,  $H_0$  is rejected and  $H_a$  is received, meanwhile if  $t_{hitung} < t_{table}$ ,  $H_0$  is received and  $H_a$  is rejected. Then the  $t_{hitung}$  of this research is 2,316 and  $t_{table}$  is 2,004 or  $2,316 > 2,004$  that can be conclude  $H_0$  is rejected and  $H_a$  is received.

## B. Discussions

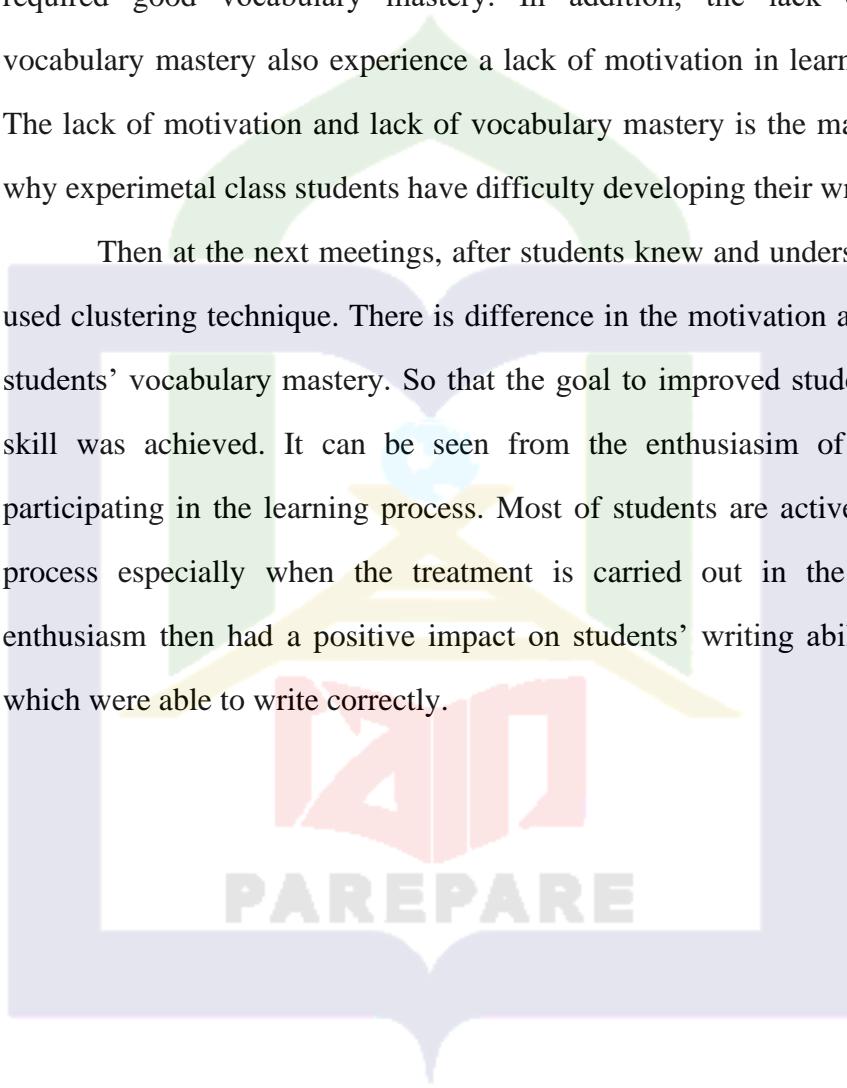

Based on data analysis on the pre-test score of experimental class and control class, it shows that the mean score of pre-test of experimental class was 37,24 and the mean score of the control class was 50,54. From mean values of pre-test scores of experimental and control classes, it can be seen that there is a significant differences between the two classes. In other words, the ability and knowledge of students' in the control class is higher than that of the experimental class.

Based on the result of data analysis on the posttest scores of students in experimental class and control class, it showed that the posttest scores in the experimental class was 76,9 and the mean scores of posttest in the control class was 66,73. From the mean scores of posttest in experimental class and control class, there is a significant difference between the two classes. In the other words, the experimental class has a significant improved in the mean scores of the posttest compered to the mean score of control class.

From the explanation above regarding students' writing ability from data analysis that has been carried out in the posttest of experimental and control classes, it can be seen that there are differences in students' writing ability. Both of the two classes had significant improvement of students' writing ability in the experimental had a significant improve compared to the control class.

On the result of observation of learning activities in the experimental class at the first meeting of the treatment, it was found that most students had low knowledge of English, especially vocabulary mastery even though writing required good vocabulary mastery. In addition, the lack of students' vocabulary mastery also experience a lack of motivation in learning English. The lack of motivation and lack of vocabulary mastery is the main problems why experimental class students have difficulty developing their writing skill.

Then at the next meetings, after students knew and understood how to used clustering technique. There is difference in the motivation and ability of students' vocabulary mastery. So that the goal to improved students' writing skill was achieved. It can be seen from the enthusiasm of students in participating in the learning process. Most of students are active in learning process especially when the treatment is carried out in the class. This enthusiasm then had a positive impact on students' writing ability, most of which were able to write correctly.

Based on observation at the first meeting in the learning process in the control class. Most of students have knowledge about writing skill but there are also students who still lack knowledge about writing. The students' lack of knowledge about writing also comes from their lack of vocabulary mastery and learning motivation. It can be seen from the learning process where only several students pay attention to the teacher's explanation and most students are not motivated in learning. At the next meeting, the students still experienced low learning motivation and lack of vocabulary mastery.

The result of the t-test from the posttest score of experimental class and control class strengthens the arguments about the significant difference between the two classes. To know the result of the independent sample t test the researcher sees in (sig.2-tailed) and  $t_{table}$ , and the sig. 2 tailed is 0,024, so the result of posttest of experimental and control classes are  $0,024 < 0,05$  that the conclusion is,  $H_0$  is rejected and  $H_a$  received which means there are significance difference posttest of experimental and control classes. Then to see the table distribution is value is  $5\%/2 = 2,5\%$  or 0,025, and the result of the analysis the (d.f) is 55 with the  $t_{0,025}$  is 2.004, to assumed it uses if  $t_{hitung} > t_{table}$ ,  $H_0$  is rejected and  $H_a$  is received, meanwhile if  $t_{hitung} < t_{table}$ ,  $H_0$  is received and  $H_a$  is rejected. Then the  $t_{hitung}$  of this research is 2.316 and  $t_{table}$  is 2.004 or  $2.316 > 2.004$  that can be conclude  $H_0$  is rejected and  $H_a$  is received.

From the explanation above, it can be concluded that in order to achieve a learning goal, hard efforts must be made by the teacher to make it easier for students to understand the lesson given. Various efforts can be made by the teacher depending on the needs required by students. Thus the teacher needs a learning strategy as a solution to the difficulties in the learning process. In this research using clustering technique as an effective solution in overcoming students' difficulties in writing. This can be proven by previous research.

In a study conducted by Iskandar, et al in 2021, which was located in the Binamu sub-district, Jeneponto Regency, with the title "*Keefektifan Penggunaan Metode Clustering dan Show Not Tell terhadap kemampuan menulis teks deskripsi Peserta Didik SMP Kelas VII Kecamatan Binamu Kabupaten Jeneponto*", from their research there was an increase in students' writing results after applying the clustering technique in the learning process. And also by Andi Paida in 2021 with the research title '*Peningkatan Kemampuan Menulis Paragraf Narasi Kelas X3 SMA Negeri 3 Sinjai Melalui Pengintegrasian Teknik Clustering dan Jurnalis Questions*', from his research there was an increase in students' writing ability by using clustering technique. The two studies above have similarities with this study which uses clustering technique as a way to overcome students' difficulties in writing English.

Then the study conducted by Rita in 2018, with the title of her research, “*Pengaruh Model Pembelajaran Kooperatif Tipe Kalimat Konsep Terhadap Kemampuan Menulis Karangan Deskrpsi Siswa Kelas X Sma Swasta Nurul Amaliyah*”, in her research, there is a significance on students’ writing ability using the cooperative learning model. It can be said that the research conducted by Rita is related to this research by conducting a learning model to see the effect of students’ writing skill.

## CHAPTER V

### CONCLUTION AND SUGGESTION

This chapter is attended of the conclusion related to the result of the study that had been discussed in the previous chapter. Additionally, positive suggestion is also provided.

#### A. Conclusion

In this study, the researcher used quantitative method the form of quantitative study, quasi experimental research supposed to discover the effect of clustering technique on students' writing ability after finishing her entire steps of the study the researcher involves the conclusion about using clustering technique in teaching writing at the eight grade of SMPN 2 Patampanua, Kab. Pinrang. The conclusion of the study for the English teacher and firther in term of writing competence. The conclusion as follow:

1. Based on the explanation in the chapter IV the means score of the experimental class in pre-test is 37,24 and mean score of posttest experimental class is 76,9 so the pre-test is more lower than posttest ( $37 < 76,9$ ). It is belonged to very good categories. The mean score of the control class in pre-test is 50,54 and mean score of control class posttest is 66,73, so the pre-test is lower than posttest ( $50,54 < 66,73$ ), it is belonged good categories but the posttest of experimental and control classes, the experimental class has more higher.
2. The testing of hypothesis also proved that clustering technique gave 0,05 or 5% significance level, the result of analysis value is higher than t-table that is  $2.316 > 2.004$ . Short, the hypothesis was accepted. It can be

concluded that using clustering technique is able to improve student's english writing at the eighth grade of SMPN 2 Patampuan, Kab. Pinrang.

## B. Susggestion

There are some suggestion from the writer for the teacher, school, and futher research as follow:

### 1. For the Teacher

The teacher need to relaized that teaching technique is more important to increasing students motivation in study English writing skill particularly. The teacher are endorsed to use the clustering technique to teaching writing material, so that it will make students energetic in teaching and learning proses also improve their motivation to study in english.

### 2. For the school

The school shuold relized that media may be very importance to inceasing the result of teaching learning process. The school must facilitate the media in teaching and learning process and make evaluation to know the problem that students and teaching have.

### 3. For the Other Researcher

For the following future researchers, the end result from this research can capable of use as reference to conduct further study later about the effect of clustering technique to improve students' English writing. It hoped that the other researcher this study on the way to controbute better improvement of the study in English teaching learning process.

Yth. Bupati Pinrang

C.q. Kepala Dinas Penanaman Modal dan Pelayanan Terpadu Satu Pintu

di,-

Kab. Pinrang

*Assalamu Alaikum Wr. Wb.*

Dengan ini disampaikan bahwa mahasiswa Institut Agama Islam Negeri Parepare :

Nama	: Ratnawati
Tempat/Tgl. Lahir	: Pinrang, 18 Oktober 2000
NIM	: 18.1300.067
Fakultas / Program Studi	: Tarbiyah / Pendidikan Bahasa Inggris
Semester	: IX (Sembilan)
Alamat	: Urung, Desa Sipatuo, Kec. Patampanua, Kab. Pinrang

Bermaksud akan mengadakan penelitian di wilayah Kab. Pinrang dalam rangka penyusunan skripsi yang berjudul "**The Effect Clustering Technique To Improve Student's English Writing At The Eight Grade Of SMPN 2 Patampanua Kab. Pinrang**". Pelaksanaan penelitian ini direncanakan pada bulan Oktober sampai bulan November Tahun 2022. Demikian permohonan ini disampaikan atas perkenan dan kerjasamanya diucapkan terima kasih.

*Wassalamu Alaikum Wr. Wb.*

Parepare, 06 Oktober 2022

Wali Dekan I,

Tembusan :

- 1 Rektor IAIN Parepare
- 2 Dekan Fakultas Tarbiyah

**PEMERINTAH KABUPATEN PINRANG  
DINAS PENDIDIKAN DAN KEBUDAYAAN  
UPT SMP NEGERI 2 PATAMPAWA**

*Alamat : Jalan Malimpung Benteng Kec. Patampanua Kab. Pinrang (K.P 912012)*

**SURAT KETERANGAN**

Nomor : 411.32 / / SMP.13 / 2022

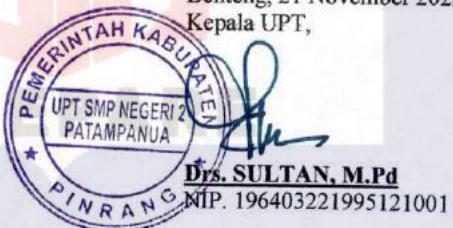

Yang bertanda tangan di bawah ini, Kepala UPT SMP Negeri 2 Patampanua Kabupaten Pinrang menerangkan bahwa :

Nama	: RATNAWATI
NIM	: 18.1300.067
Jenis Kelamin	: Perempuan
Program Studi	: Pendidikan Bahasa Inggris

Benar yang namanya tersebut di atas, telah mengadakan penelitian pada UPT SMP Negeri 2 Patampanua Kabupaten Pinrang dari tanggal 29 Oktober 2022 s/d 19 November 2022, dengan judul penelitian **“The Effect Of Clustering Technique To Improve Student’s English Writing At The Eighth Grade Of SMPN 2 Patampanua Kab. Pinrang”**.

Demikian surat keterangan ini diberikan untuk dipergunakan sebagaimana mestinya.

Benteng, 21 November 2022  
Kepala UPT,

**PEMERINTAH KABUPATEN PINRANG**  
**DINAS PENANAMAN MODAL DAN PELAYANAN TERPADU SATU PINTU**  
**UNIT PELAYANAN TERPADU SATU PINTU**  
**Jl. Jend. Sukawati Nomor 40. Telp/Fax : (0421)921695 Pinrang 91212**

---

**KEPUTUSAN KEPALA DINAS PENANAMAN MODAL  
DAN PELAYANAN TERPADU SATU PINTU KABUPATEN PINRANG**  
Nomor : 503/0555/PENELITIAN/DPMPTSP/10/2022

Tentang

**REKOMENDASI PENELITIAN**

**Menimbang** : bahwa berdasarkan penelitian terhadap permohonan yang diterima tanggal 19-10-2022 atas nama RATNAWATI, dianggap telah memenuhi syarat-syarat yang diperlukan sehingga dapat diberikan Rekomendasi Penelitian.

**Mengingat** : 1. Undang - Undang Nomor 29 Tahun 1959;  
2. Undang - Undang Nomor 18 Tahun 2002;  
3. Undang - Undang Nomor 25 Tahun 2007;  
4. Undang - Undang Nomor 25 Tahun 2009;  
5. Undang - Undang Nomor 23 Tahun 2014;  
6. Peraturan Presiden RI Nomor 97 Tahun 2014;  
7. Peraturan Menteri Dalam Negeri Nomor 64 Tahun 2011 sebagaimana telah diubah dengan Peraturan Menteri Dalam Negeri Nomor 7 Tahun 2014;  
8. Peraturan Bupati Pinrang Nomor 48 Tahun 2016; dan  
9. Peraturan Bupati Pinrang Nomor 38 Tahun 2019.

**Memperhatikan** : 1. Rekomendasi Tim Teknis PTSP : 1650/R/T.Teknis/DPMPTSP/10/2022, Tanggal : 19-10-2022  
2. Berita Acara Pemeriksaan (BAP) Nomor : 0555/BAP/PENELITIAN/DPMPTSP/10/2022, Tanggal : 19-10-2022

**M E M U T U S K A N**

**Menetapkan** :

**KESATU** : Memberikan Rekomendasi Penelitian kepada :

1. Nama Lembaga	: INSTITUT AGAMA ISLAM NEGERI (IAIN) PAREPARE
2. Alamat Lembaga	: JL. AMAL BAKTI NO. 08 SOREANG, PAREPARE
3. Nama Peneliti	: RATNAWATI
4. Judul Penelitian	: THE EFFECT OF CLUSTERING TECHNIQUE TO IMPROVE STUDENT'S ENGLISH WRITING AT THE EIGHTH GRADE OF SMPN 2 PATAMPANUA KAB. PINRANG
5. Jangka waktu Penelitian	: 1 Bulan
6. Sasaran/target Penelitian	: SISWA KELAS 8 SMPN 2 PATAMPANUA
7. Lokasi Penelitian	: Kecamatan Patampanua

**KEDUA** : Rekomendasi Penelitian ini berlaku selama 6 (enam) bulan atau paling lambat tanggal 19-04-2023.

**KETIGA** : Peneliti wajib mentaati dan melakukan ketentuan dalam Rekomendasi Penelitian ini serta wajib memberikan laporan hasil penelitian kepada Pemerintah Kabupaten Pinrang melalui Unit PTSP selambat-lambatnya 6 (enam) bulan setelah penelitian difaksikanan.

**KEEMPAT** : Keputusan ini mulai berlaku pada tanggal ditetapkan, apabila dikemudian hari terdapat kekeliruan, dan akan diadakan perbaikan sebagaimana mestinya.

Diterbitkan di Pinrang Pada Tanggal 19 Oktober 2022

### **Lesson Planning of Experimental Class**

Nama Sekolah	: SMP Negeri 2 Patampanua
Mata Pelajaran	: Bahasa Inggris
Kelas/ Semester	: VIII/Ganjil ( Kelas Eksperimen)
Alokasi Waktu	: 2 x 40 menit
Materi	: Descriptif Teks

#### **A. Kompetensi Inti**

- KI 1 : Menghargai dan menghayati ajaran agama yang dianutnya.
- KI 2 : Menghargai dan menghayati perilaku jujur, disiplin, tanggungjawab, peduli ( toleransi, gotong royong), santun, percaya diri, dalam berinteraksi secara efektif dengan lingkungan sosial dan alam dalam jangkauan pergaulan dan keberadaannya.
- KI 3 : Menghargai dan menerapkan pengetahuan (faktual, konseptual, dan prosedural) berdasarkan rasa ingin tahu tentang ilmu pengetahuan, teknologi, seni, budaya terkait fenomena dan kejadian tampak mata.
- KI 4 : Mengolah, menyajikan, dan menalar dalam ranah konkret ( menggunakan, mengurai, merangkai, memodifikasi, dan membuat) dan ranah abstrak ( menulis, membaca, menghitung, menggambar, dan mengarang) sesuai dengan yang dipelajari di sekolah dan sumber lain yang sama dalam sudut pandang/teori.

#### **B. Kompetensi Dasar dan Indikator**

Kompetensi Dasar	Indikator Pencapaian Kompetensi
1.1.Mensyukuri kesempatan dapat mempelajari bahasa inggris sebagai bahasa pengantar komunikasi internasional yang	1.1.1. Menunjukkan rasa syukur kepada Tuhan selama pembelajaran

diwujudkan dalam semangat belajar.	
2.3. Menunjukkan perilaku tanggungjawab, peduli, kerjasama, dan cinta damai, dalam melaksanakan komunikasi fungsional.	2.3.1. Menunjukkan perilaku peduli dalam pembelajaran
3.10. Menerapkan struktur teks dan unsur kebahasaan untuk melaksanakan fungsi sosial teks deskriptif dengan menyatakan tentang deskripsi orang, binatang, dan benda, pendek dan sederhana, sesuai dengan konteks penggunaannya	3.10.1. Memberi nama binatang. 3.10.2. Mengidentifikasi sifat binatang 3.10.3. Mendeskripsikan binatang 3.10.4. Menyebutkan fungsi sosial teks deskriptif
4.11. Menangkap makna dalam teks deskripsi lisan dan tulisan, pendek dan sederhana	4.11.1. Menentukan gambaran umum dari sebuah teks. 4.11.2. Menentukan informasi tertentu dari teks sederhana. 4.11.3. Menentukan informasi rinci dari teks sederhana
4.12. Menyusun teks deskriptif lisan dan tulisan, pendek dan sederhana tentang orang, binatang, dan benda, dengan memperhatikan fungsi sosial, struktur teks, dan unsur kebahasaan yang benar sesuai konteks	4.12.1. Melengkapi teks deskriptif sederhana tentang binatang. 4.12.2. Menyusun teks deskriptif sederhana tentang binatang.

### C. Materi Pembelajaran

#### 1. Meteri Reguler

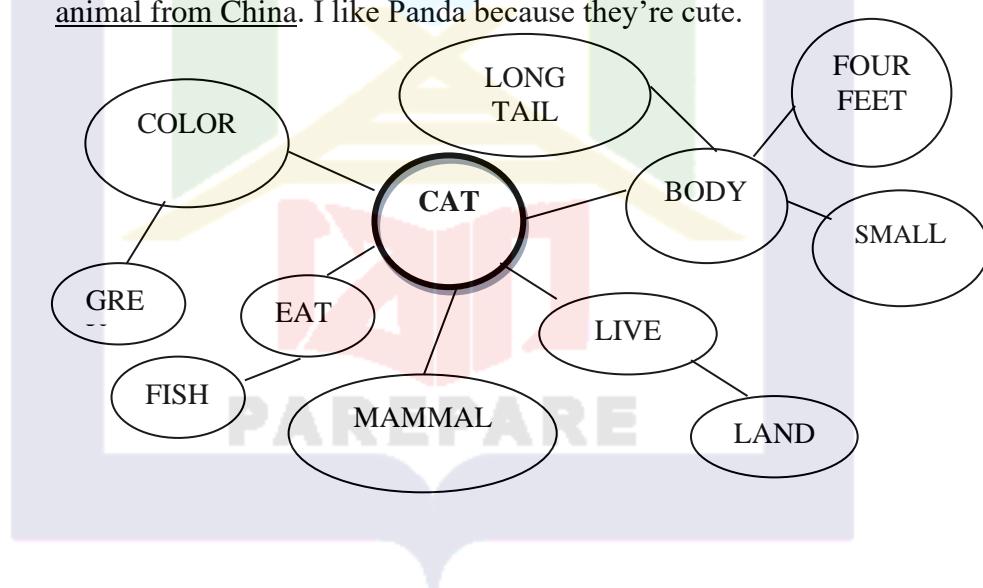

Teks deskriptif lisan dan tulisan, pendek dan sederhana, tentang orang, binatang, dan benda.

#### Cat

It is cat. It is mammal. It is live on land. It is eat fish. It is body black and white. It is color is grey. It is small, long tail, and has four feet.

#### Panda

I went to the zoo yesterday and I saw panda for the first time. Panda is the very cute animal I've ever seen. It has little eyes with black spots around them. His body is black and white colored. Panda's almost look alike with bear. Panda looks like tame animals but it's actually not. Panda eats bamboo and they almost eat 40 kg bamboo in just one day. Panda is animal from China. I like Panda because they're cute.

## 2. Materi Remedial

### Generic Structure Deskcriptive Text

- a. Identification ( identifikasi) adalah pendahuluan, berupa gambaran umum tentang suatu topik.
- b. Description (deskripsi) adalah berisi ciri-ciri khusus yang dimiliki benda, tempat, atau orang yang dideskripsikan.

### Ciri-ciri Deskriptif Teks

- a. Menggunakan simple present tense
- b. Menggunakan verb, seperti be ( am, is, are)
- c. Mudah dipahami
- d. Menggambarkan
- e. Komunikatif
- f. Dapat membuat pembaca tertarik
- g. Menggambarkan objek secara spesifik

3. Buat sebuah contoh deskriptif teks tentang orang, binatang atau benda sesuai dengan penggunaan struktur bahasa.

## D. Metode Pembelajaran

Pendekatan : Saintifik

Model : Kooperatif

Strategi : Clustering teknik

## E. Alat dan Sumber

Media : Gambar

Alat/Bahan : Papan tulis, Spidol

Sumber Belajar : - Buku When Rings a Bell. Chapter

## F. Langkah-langkah Pembelajaran

### Pertemuan 1

#### a. Pendahuluan/ Kegiatan Awal

##### Apersepsi dan motivasi

- Guru masuk kelas dan menyapa dengan menggunakan bahasa Inggris agar English Environment dapat langsung tercipta.
- Guru mengecek kehadiran siswa
- Guru mereview materi sebelumnya
- Guru mengajukan pertanyaan menantang pada siswa
- Guru menyampaikan manfaat materi pembelajaran

##### Penyampaian Kompetensi dan Rencana Kegiatan

- Menyampaikan kemampuan yang akan dicapai peserta didik
- Menyampaikan rencana kegiatan misalnya, individu, kerja kelompok, dan melakukan observasi

#### b. Kegiatan Inti

PESERTA DIDIK	GURU	WAKTU
Mengamati ( <i>observing</i> ) <ul style="list-style-type: none"> <li>- Peserta didik mendengarkan dan membaca beberapa contoh teks deskriptif singkat sederhana tentang binatang</li> <li>- Peserta didik mendengarkan dan membaca beberapa contoh teks deskriptif singkat sederhana tentang orang.</li> </ul>	<ul style="list-style-type: none"> <li>- Meminta peserta didik memperhatikan contoh teks deskriptif singkat dan sederhana tentang binatang</li> <li>- Meminta peserta didik memperhatikan fungsi</li> </ul>	10 menit

<ul style="list-style-type: none"> <li>- Siswa memperhatikan fungsi sosial, struktur teks dan unsur kebahasaan teks deskriptif singkat dan sederhana tentang binatang</li> </ul>	<p>sosial, struktur teks, unsur kebahasaan, maupun format pembuatan kalimat teks deskriptif tentang hewan binatang</p>	
<p>Menanyakan (<i>Questioning</i>) Menanyakan antara lain perbedaan antara teks atau kalimat teks deskriptif singkat dan sederhana tentang binatang dalam berbagai konteks</p>	<p>Dengan bimbingan dan arahan guru, siswa menanyakan perbedaan antara teks deskriptif singkat dan sederhana tentang binatang dalam berbagai konteks</p>	
<p>Mengeksplorasi/ Berekspresi/ mengumpulkan informasi</p> <ul style="list-style-type: none"> <li>- Siswa membaca contoh-contoh teks deskriptif singkat dan sederhana tentang binatang</li> <li>- Membacakan teks deskriptif kepada teman dengan menggunakan unsur kebahasaan yang tepat</li> </ul>	<ul style="list-style-type: none"> <li>- Meminta peserta didik membagi menjadi beberapa kelompok</li> <li>- Guru menerapkan <i>clustering</i> teknik</li> <li>- Meminta siswa membuat teks deskriptif dengan tema binatang</li> </ul> <p>Meminta peserta didik membaca teks deskriptif kepada teman dengan menggunakan unsur kebahasaan yang tepat</p>	<p>30 menit</p>
<b>PESERTA DIDIK</b>	<b>GURU</b>	<b>WAKTU</b>

Mengasosiasi ( <i>Associating</i> ) - Secara berpasangan peserta didik saling menganalisis teks deskriptif dengan fokus pada fungsi sosial, struktur, dan unsur kebahasaan.	- Meminta peserta didik berpasangan saling menganalisis teks deskriptif dengan fokus pada fungsi sosial, struktur, dan unsur kebahasaan	10 menit
Mengkomunikasikan/ ( <i>Communicating/Networking</i> ) - Siswa mendeskripsikan binatang untuk mengenalkan, dengan bahasa inggris, di dalam kelas.	- Meminta peserta didik mendeskripsikan binatang yang ada disekitarnya dengan bahasa inggris baik yang ada di lingkungan sekitar siswa.	25 menit

c. Penutup

- Melakukan refleksi atau membuat rangkuman dalam melibatkan peserta didik
- Memberikan tes tulisan
- Mengumpulkan hasil kerja sebagai bahan portofolio
- Melaksanakan tindak lanjutan dengan memberikan arahan kegiatan berikutnya dan tugas pengayaan.

### Pertemuan Ke-2

a. Pendahuluan/ Kegiatan Awal

Apresepsi dan motivasi

- Guru masuk kelas dan menyapa dengan menggunakan bahasa inggris agar English Environtment dapat langsung tercipta.

- Guru mengecek kehadiran siswa
- Guru mereview materi sebelumnya
- Guru mengajukan pertanyaan menantang pada siswa
- Guru menyampaikan manfaat materi pembelajaran

**Penyampaian Kompetensi dan Rencana Kegiatan**

- Menyampaikan kemampuan yang akan dicapai peserta didik
- Menyampaikan rencana kegiatan misalnya, individu, kerja kelompok, dan melakukan observasi

**b. Kegiatan Inti**

PESERTA DIDIK	GURU	WAKTU
Mengamati ( <i>observing</i> ) <ul style="list-style-type: none"> <li>- Peserta didik mendengarkan/membaca beberapa contoh teks deskriptif singkat sederhana tentang orang.</li> <li>- Siswa memperhatikan fungsi sosial, struktur teks dan unsur kebahasaan teks deskriptif singkat dan sederhana tentang binatang</li> </ul>	<ul style="list-style-type: none"> <li>- Meminta peserta didik memperhatikan contoh teks deskriptif singkat dan sederhana tentang binatang</li> <li>- Meminta peserta didik memperhatikan fungsi sosial, struktur teks, unsur kebahasaan, maupun format pembuatan kalimat teks deskriptif tentang hewan</li> </ul>	10 menit

### **RPP Kelas Kontrol**

Nama Sekolah	: SMP Negeri 2 Patampuan
Mata Pelajaran	: Bahasa Inggris
Kelas/ Semester	: VIII/Ganjil ( Kelas Kontrol)
Alokasi Waktu	: 2 x 40 menit
Materi	: Descriptif Teks

#### **A. Kompetensi Inti**

- KI 1 : Menghargai dan menghayati ajaran agama yang dianutnya.
- KI 2 : Menghargai dan menghayati perilaku jujur, disiplin, tanggungjawab, peduli ( toleransi, gotong royong), santun, percaya diri, dalam berinteraksi secara efektif dengan lingkungan sosial dan alam dalam jangkauan pergaulan dan keberadaannya.
- KI 3 : Menghargai dan menerapkan pengetahuan (faktual, konseptual, dan prosedural) berdasarkan rasa ingin tahu tentang ilmu pengetahuan, teknologi, seni, budaya terkait fenomena dan kejadian tampak mata.
- KI 4 : Mengolah, menyajikan, dan menalar dalam ranah konkret ( menggunakan, mengurai, merangkai, memodifikasi, dan membuat) dan ranah abstrak ( menulis, membaca, menghitung, menggambar, dan mengarang) sesuai dengan yang dipelajari di sekolah dan sumber lain yang sama dalam sudut pandang/teori.

#### **B. Kompetensi Dasar dan Indikator**

<b>Kompetensi Dasar</b>	<b>Indikator Pencapaian Kompetensi</b>
1.2.Mensyukuri kesempatan dapat mempelajari bahasa inggris sebagai bahasa pengantar komunikasi internasional yang	1.2.1. Menunjukkan rasa syukur kepada Tuhan selama pembelajaran

diwujudkan dalam semangat belajar.	
2.4. Menunjukkan perilaku tanggungjawab, peduli, kerjasama, dan cinta damai, dalam melaksanakan komunikasi fungsional.	2.4.1. Menunjukkan perilaku peduli dalam pembelajaran
3.10. Menerapkan struktur teks dan unsur kebahasaan untuk melaksanakan fungsi sosial teks deskriptif dengan menyatakan tentang deskripsi orang, binatang, dan benda, pendek dan sederhana, sesuai dengan konteks penggunaannya	3.10.1. Memberi nama benda dan binatang. 3.10.2. Mengidentifikasi sifat denda dan binatang 3.10.3. Mendeskripsikan benda dan binatang 3.10.4. Menyebutkan fungsi sosial teks deskriptif
4.11. Menangkap makna dalam teks deskripsi lisan dan tulisan, pendek dan sederhana	4.11.1. Menentukan gambaran umum dari sebuah teks. 4.11.2. Menentukan informasi tertentu dari teks sederhana. 4.11.3. Menentukan informasi rinci dari teks sederhana
4.12. Menyusun teks deskriptif lisan dan tulisan, pendek dan sederhana tentang orang, binatang, dan benda, dengan memperhatikan fungsi sosial, struktur teks, dan unsur kebahasaan yang benar sesuai konteks	4.12.1. Melengkapi teks deskriptif sederhana tentang benda dan binatang. 4.12.2. Menyusun teks deskriptif sederhana tentang benda dan binatang.

### C. Materi Pembelajaran

#### 1. Meteri Reguler

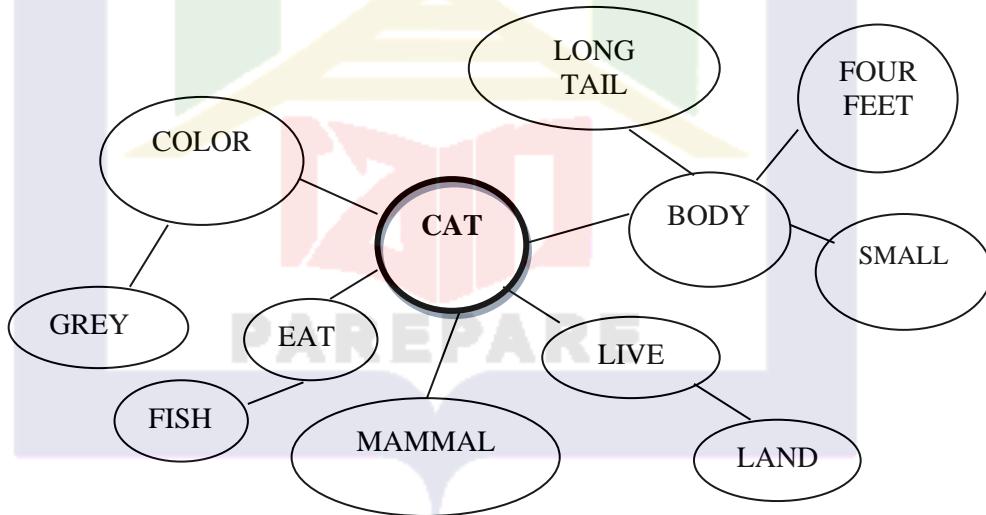

Teks deskriptif lisan dan tulisan, pendek dan sederhana, tentang orang, binatang, dan benda.

#### Cat

It is cat. It is mammal. It is live on land. It is eat fish. It is body black and white. It is color is grey. It is small, long tail, and has four feet.

#### Panda

I went to the zoo yesterday and I saw panda for the first time. Panda is the very cute animal I've ever seen. It has little eyes with black spots around them. His body is black and white colored. Panda's almost look alike with bear. Panda looks like tame animals but it's actually not. Panda eats bamboo and they almost eat 40 kg bamboo in just one day. Panda is animal from China. I like Panda because they're cute.

#### 2. Materi Remedial

Generic Structure Deskcriptive Text

- Identification (identifikasi) adalah pendahuluan, berupa gambaran umum tentang suatu topik.

- b. Description (deskripsi) adalah berisi ciri-ciri khusus yang dimiliki benda, tempat, atau orang yang dideskripsikan.

#### Ciri-ciri Deskriptif Teks

- a. Menggunakan simple present tense
- b. Menggunakan verb, seperti be ( am, is, are)
- c. Mudah dipahami
- d. Menggambarkan
- e. Komunikatif
- f. Dapat membuat pembaca tertarik
- g. Menggambarkan objek secara spesifik
- h. Buat sebuah contoh deskriptif teks tentang orang, binatang atau benda sesuai dengan penggunaan struktur bahasa.

#### D. Metode Pembelajaran

Pendekatan : Teacher Centered Approach

Model : Konvensional

Strategi : Ceramah

#### E. Alat dan Sumber

Media : Gambar

Alat/Bahan : Papan tulis, Spidol

Mengamati ( <i>observing</i> ) <ul style="list-style-type: none"> <li>- Peserta didik mendengarkan/n/membaca beberapa contoh teks deskriptif singkat sederhana tentang orang.</li> <li>- Siswa memperhatikan fungsi sosial, struktur teks, unsur kebahasaan, maupun format pembuatan kalimat teks deskriptif singkat dan</li> </ul>	<ul style="list-style-type: none"> <li>- Meminta peserta didik memperhatikan contoh teks deskriptif singkat dan sederhana tentang binatang</li> <li>- Meminta peserta didik memperhatikan fungsi sosial, struktur teks, unsur kebahasaan, maupun format pembuatan kalimat teks deskriptif tentang hewan</li> </ul>	10 menit

sederhana tentang binatang		
Menanyakan ( <i>Questioning</i> ) Menanyakan antara lain perbedaan anara teks atau kalimat teks deskriptif singkat dan sederhana tentang binatang dalam berbagai konteks	Dengan bimbingan dan arahan guru, siswa menanyakan perbedaan antara teks deskriptif singkat dan sederhana tentang binatang dalam berbagai konteks	
Mengeksplorasi/ Bereksprimen/ mengumpulkan informasi <ul style="list-style-type: none"> <li>- Siswa membaca contoh-contoh teks deskriptif singkat dan sederhana tentang binatang</li> <li>- Membacakan teks deskriptif kepada teman dengan menggunakan unsur kebahasaan yang tepat</li> </ul>	<ul style="list-style-type: none"> <li>- Meminta peserta didik membaca/mendengarkan beberapa teks deskriptif dari berbagai sumber</li> <li>- Meminta peserta didik membaca teks deskriptif kepada teman dengan menggunakan unsur kebahasaan yang tepat</li> </ul>	30 menit
<b>PESERTA DIDIK</b>	<b>GURU</b>	<b>WAKTU</b>
Mengasosiasi ( <i>Associating</i> ) <ul style="list-style-type: none"> <li>- Secara berpasangan peserta didik saling menganalisis teks deskriptif dengan fokus pada fungsi sosial, struktur, dan unsur kebahasaan.</li> </ul>	<ul style="list-style-type: none"> <li>- Meminta peserta didik berpasangan saling menganalisis teks deskriptif dengan fokus pada fungsi sosial, struktur, dan unsur kebahasaan</li> </ul>	10 menit
Mengkomunikasikan/ ( <i>Communicating/Networking</i> )	<ul style="list-style-type: none"> <li>- Meminta peserta didik mendeskripsikan</li> </ul>	25 menit

<ul style="list-style-type: none"> <li>- Siswa mendeskripsikan binatang untuk mengenalkan, dengan bahasa Inggris, di dalam kelas.</li> </ul>	<p>binaan yang ada disekitarnya dengan bahasa Inggris baik yang ada di lingkungan sekitar siswa.</p>	
--	--	--

### c. Penutup

- Melakukan refleksi atau membuat rangkuman dalam melibatkan peserta didik
- Memberikan tes tulisan
- Mengumpulkan hasil kerja siswa
- Melaksanakan tindak lanjutan dengan memberikan arahan kegiatan berikutnya

## Pertemuan Ke-2

### a. Pendahuluan/ Kegiatan Awal

#### Apresepsi dan motivasi

- Guru masuk kelas dan menyapa dengan menggunakan bahasa Inggris agar English Environment dapat langsung tercipta.
- Guru mengecek kehadiran siswa
- Guru mereview materi sebelumnya
- Guru mengajukan pertanyaan menantang pada siswa
- Guru menyampaikan manfaat materi pembelajaran

#### Penyampaian Kompetensi dan Rencana Kegiatan

- Menyampaikan kemampuan yang akan dicapai peserta didik
- Menyampaikan rencana kegiatan misalnya, individu, kerja kelompok, dan melakukan observasi

### b. Kegiatan Inti

PESERTA DIDIK	GURU	WAKTU
---------------	------	-------

Mengamati ( <i>observing</i> ) <ul style="list-style-type: none"> <li>- Peserta didik mendengarkan/membaca beberapa contoh teks deskriptif singkat sederhana tentang binatang</li> <li>- Siswa memperhatikan fungsi sosial, struktur teks dan unsur kebahasaan teks deskriptif singkat dan sederhana tentang binatang</li> </ul>	<ul style="list-style-type: none"> <li>- Meminta peserta didik memperhatikan contoh teks deskriptif singkat dan sederhana tentang binatang</li> <li>- Meminta peserta didik memperhatikan fungsi sosial, struktur teks, unsur kebahasaan, maupun format pembuatan kalimat teks deskriptif tentang hewan</li> </ul>	10 menit

c. Penutup

- Melakukan refleksi atau membuat rangkuman dalam melibatkan peserta didik
- Memberikan tes tulisan

## INSTRUMEN OF THE TEST

Name:

Class :

1. What is the animal picture above?
2. What is the kind of that animal?
3. Where the animal live?
4. What is the animal eats?
5. What is the sized of the animal?
6. What is the color of the animal?
7. Base on the answer above write a descriptive text!

Nama : Rosni  
Kelas : VIII, 5

1. Panda
2. mammal
3. forest, land
4. Bamboo
5. big, fourt foot, small tail
6. black and white
7. It is panda. It is mammal. It is live forest, land. It is eat bamboo. It is body, fourt foot, small tail. It is color black and white.

$$= \frac{3 \cdot 4 + 2 \cdot 4 + 2 \cdot 4 + 1,5 \cdot 4 + 1,5 \cdot 4}{40}$$

$$= \frac{12 + 8 + 8 + 6 + 6}{40} \times 100$$

$$= \frac{40}{40} \times 100 = \underline{\underline{100}}$$

<input type="checkbox"/>	1. panda
<input type="checkbox"/>	2. mammal
<input checked="" type="checkbox"/>	3. forest, land
<input type="checkbox"/>	4. bamboo
<input type="checkbox"/>	5. big, fourt foot, small tail
<input type="checkbox"/>	6. black and white
<input type="checkbox"/>	it is panda
<input type="checkbox"/>	it is mammal
<input type="checkbox"/>	it is live Forest, land
<input type="checkbox"/>	it is eat bamboo
<input type="checkbox"/>	it is body big, fourt foot, small tail
<input type="checkbox"/>	it is color black and white

$$\begin{aligned}
 & 3.4 + 2.4 + 2.4 + 1.4 + 1.8 \cdot 4 \\
 & = 12 + 8 + 0.6 + 6 \text{ km} \\
 & = 100.40 \text{ km} \\
 & = 100.40 \text{ km}
 \end{aligned}$$

Kelas : VIII/8.3

Nama : CUT RA'RIFAH

~~Jawab.~~

1. it is Panda.
2. ~~Mammal~~ Mammal
3. ~~land~~ land
4. bamboo
5. big
6. black and white
7. He is Panda
- 
- 
- 

$$3.4.2 + 2 + 2.1 + 1.8.3 + 1.5.1 = 60$$

$$= \frac{12 + 4 + 2 + 7.8 + 1.8}{60} \times 60$$

$$= \frac{29}{60} \times 60 = 29$$

Nama: Najwa azisa  
Kelas: VIII-3

No. \_\_\_\_\_  
Date: \_\_\_\_\_

Panda

it is panda, it is mammal, it is live in land.  
it is eat bamboo, it is big body, it is color white and black

11 " " "

panda

1 it is panda

2 it is mammal

3 it is live in land

4 it is eat bamboo

5 it is big body

6 it is color white and black

7 it is panda, it is mammal, it is live in land

it is eat bamboo, it is big body, it is color white and black.

$$\underline{3.4 + 2.4 + 2.3 + 15.4 + 15.4 \times 100}$$

40

$$\rightarrow 12 + 8 + 6 + 6 + 6 \times 100$$

$\sqrt{20}$

$$\rightarrow \frac{58}{40} \times 100 = 95$$

The activities in the classroom

1. Experimental class

2. Control class

## Profil Sekolah

**1. Identitas Sekolah**

1 Nama Sekolah	:	UPT SMP NEGERI 2 PATAMPAWA
2 NPSN	:	40305108
3 Jenjang Pendidikan	:	SMP
4 Status Sekolah	:	Negeri
5 Alamat Sekolah	:	Urung
RT / RW	:	0 / 0
Kode Pos	:	91252
Kelurahan	:	Sipatuo
Kecamatan	:	Kec. Patampanua
Kabupaten/Kota	:	Kab. Pinrang
Provinsi	:	Prov. Sulawesi Selatan
Negara	:	Indonesia
6 Posisi Geografis	:	-3,6975 Lintang 119,6861 Bujur

**3. Data Pelengkap**

7 SK Pendirian Sekolah	:	030/U/79
8 Tanggal SK Pendirian	:	1979-02-01
9 Status Kepemilikan	:	Pemerintah Pusat
10 SK Izin Operasional	:	36 TAHUN 2018
11 Tgl SK Izin Operasional	:	2018-09-04
12 Kebutuhan Khusus Dilayani	:	
13 Nomor Rekening	:	0502020000003623
14 Nama Bank	:	BPD SULAWESI SELATAN
15 Cabang KCP/Unit	:	BPD SULAWESI SELATAN CABANG PINRANG...
16 Rekening Atas Nama	:	UPTSMNP2PATAMPAWA...
17 MBS	:	Tidak
18 Memungut Iuran	:	Tidak
19 Nominal/siswa	:	0
20 Nama Wajib Pajak	:	
21 NPWP	:	003315611802000

**3. Kontak Sekolah**

20 Nomor Telepon	:	
21 Nomor Fax	:	
22 Email	:	smp2patampanua@yahoo.com
23 Website	:	http://

**4. Data Periodik**

24 Waktu Penyelenggaraan	:	Pagi/6 hari
25 Bersedia Menerima Bos?	:	Ya
26 Sertifikasi ISO	:	Belum Bersertifikat
27 Sumber Listrik	:	PLN
28 Daya Listrik (watt)	:	900
29 Akses Internet	:	Lainnya (Serat Optik)
30 Akses Internet Alternatif	:	Tidak Ada

**5. Sanitasi**
**Sustainable Development Goals (SDG)**

31 Sumber air	:	Pompa
32 Sumber air minum	:	Tidak Ada
33 Kecukupan air bersih	:	Cukup sepanjang waktu
Sekolah menyediakan jamban yang dilengkapi dengan fasilitas pendukung untuk digunakan oleh siswa berkebutuhan khusus	:	Tidak
35 Tipe jamban	:	Leher angsa (toilet duduk/jongkok)
Sekolah menyediakan pembalut	:	
36	:	Tidak ada

Jumlah hari dalam seminggu siswa	:	Tidak pernah
37 mengikuti kegiatan cuci tangan berkelompok	:	10
38 Jumlah tempat cuci tangan	:	0
39 jumlah tempat cuci tangan rusak	:	Ya
40 Apakah sabun dan air mengalir pada tempat cuci tangan	:	Ada saluran pembuangan air limbah ke tangki septic atau IPAL
41 Sekolah memiliki saluran pembuangan air limbah dari jamban	:	Sekolah pernah menguras tangki septic
42 dalam 3 hingga 5 tahun terakhir dengan truk/motor sedot tinja	:	Ya
Stratifikasi UKS	:	
43 Sekolah memiliki selokan untuk menghindari genangan air di setiap ruang kelas (Sesuai	:	Ya
44 permendikbud tentang standar sarpras)	:	Ya
Sekolah menyediakan tempat sampah	:	
45 tertutup di setiap unit jamban perempuan	:	Ya
46 Sekolah menyediakan cermin di setiap unit jamban perempuan	:	Tidak
47 Sekolah memiliki tempat pembuangan sampah sementara (TPS) yang tertutup	:	Tidak
Sampah dari tempat pembuangan	:	
48 sampah sementara diangkut secara rutin	:	Ya
Ada perencanaan dan penganggaran	:	
49 untuk kegiatan pemeliharaan dan perawatan sanitasi sekolah	:	Ya
Ada kegiatan rutin untuk melibatkan	:	
50 siswa untuk memelihara dan merawat fasilitas sanitasi di sekolah	:	Ya
51 Ada kerjasama dengan pihak luar untuk sanitasi sekolah	:	Ada, dengan pemerintah daerah Ada, dengan perusahaan swasta <input checked="" type="checkbox"/> Ada, dengan puskesmas Ada, dengan lembaga non-pemerintah
52 Jumlah jamban dapat digunakan	:	Jamban laki-laki      Jamban perempuan      Jamban bersama 5                          7                          0
53 Jumlah jamban tidak dapat digunakan	:	Jamban laki-laki      Jamban perempuan      Jamban bersama 0                          0                          0

**Sekolah memiliki kegiatan dan media komunikasi, informasi dan edukasi (KIE) tentang sanitasi sekolah**
